IEE Proceedings

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 141 1994

The *IEE Proceedings* is published in eleven titles, as follows:

IEE Proceedings — Science, Measurement and Technology

IEE Proceedings — Electric Power Applications

IEE Proceedings — Generation, Transmission and Distribution

IEE Proceedings — Control Theory and Applications

IEE Proceedings — Computers and Digital Techniques

IEE Proceedings — Radar, Sonar and Navigation

IEE Proceedings — Circuits, Devices and Systems

IEE Proceedings — Microwaves, Antennas and Propagation

IEE Proceedings — Communications

IEE Proceedings — Optoelectronics

IEE Proceedings — Vision, Image and Signal Processing

Six issues of each Title are published during the year.

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

Single copies may be made for the purpose of research or private study.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $7.50 per copy is paid directly to the Copyright Clearance Center, Inc, 21 Congress Street, Salem, MA 01970, USA. 0143–702X/93 $7.50 + 0.00. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Multiple copying of the content of this publication without permission is always illegal.

The telephone number of the IEE London office is 071 240 1871; telex: 261176 IEELDN G; facsimile: 071 240 77 35.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ADAPTIVE CONTROL

Adaptive control of discrete systems using neural networks **CTA** p209
Adaptive load shedding for isolated power systems **GTD** p491
Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Adaptive optimum start-up and shut-down time controllers for heating systems based on a robust gradient method **CTA** p323
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Bilinear self-tuning control of a high temperature heat treatment plant **CTA** p12
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Global robust adaptive control of power systems **GTD** p429
GMV technique for nonlinear control with neural networks **CTA** p57
High-performance controllers for HVDC transmission links **GTD** p422
Multivariable adaptive control of AC-DC systems **GTD** p658
New robust adaptive load-frequency control with system parametric uncertainties **GTD** p184
Online system identification using Laguerre series **CTA** p249
Power system stabilisation using the dominant subsystem principle **GTD** p243
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Self tuning of computed torque gains by using neural networks with flexible structures **CTA** p235

AEROSPACE SYSTEMS

Advanced aircraft flight control using nonlinear inverse dynamics **CTA** p418
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Identification of the SA-330 Puma helicopter **CTA** p130
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202

AMPLIFIERS

Analysis of a composite amplifier technique for optimum noise performance **CDS** p210
Applying the controlled aliasing technique for fast prediction of the output response of nonlinear circuits driven by composite signals **CDS** p65
CMOS triode-transistor transconductor for high-frequency continuous-time filters **CDS** p462
Computer-aided design of an RF MOSFET power amplifier **CDS** p433
Coplanar waveguide two-stage balanced MMIC amplifier using impedance-transforming lumped-distributed branchline couplers **MAP** p241
Design and operation of poly-Si analogue circuits **CDS** p60
Differential-current derived feedback in error-correcting audio amplifier applications **CDS** p227
Effect of delay mismatch on a feedforward amplifier **CDS** p140
Leap-frog circuit compensating influence of GB product and second pole of operational amplifier **CDS** p203
Low-DC power 2-18 GHz monolithic matrix amplifier **MAP** p440
Maximum frequency and optimum performance of class E power amplifiers **CDS** p174
Modified determinations of stability criteria for accurate designing the linear two-port amplifiers **MAP** p238
Modular SPICE macromodel for operational amplifiers **CDS** p417
MOS analogue circuit simulation with SPICE **CDS** p265
New high accuracy pulse width modulation based digital-to-analogue convertor/power amplifier **CDS** p315
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458

ANALOGUE ELECTRONICS

Clock feedthrough analysis and cancellation in current sample/hold circuits **CDS** p510
Effects of the sampling pulse width on the frequency characteristics of a sample-and-hold circuit **CDS** p328
Optimisation of signal phase split in vector modulator phase shifters **CDS** p207

ANTENNA ACCESSORIES

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Active antenna top-cover frequency pulling effects **MAP** p374
Analysis of radiation pattern effects in sequentially rotated arrays **MAP** p313
Array-fed reconfigurable reflector for spacecraft applications **MAP** p531
Environmental coupling loss effects in superconducting HF loop antenna design **MAP** p94
Phased array antenna with a multilayer substrate **MAP** p295
Simplified treatment of wire-to-plate junctions with magnetic-current frill excitation **MAP** p133

ANTENNA ARRAYS

Algorithmic engineering in adaptive signal processing: worked examples **VIS** p19
Analysis of radiation pattern effects in sequentially rotated arrays **MAP** p313
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
Linear array geometry synthesis with minimum sidelobe level and null control **MAP** p162
Manifold interpolation for diversely polarised arrays **RSN** p19
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
New stacked microstrip antenna with large bandwidth and high gain **MAP** p199
Optimisation of radiation efficiency for a transverse ground-plane slot in boxed-stripline **MAP** p509
Performance of Zolotarev and modified-Zolotarev difference pattern array distributions **MAP** p37
Phased array antenna with a multilayer substrate **MAP** p295
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Recursive super-resolution algorithm for low-elevation target angle tracking in multipath **RSN** p223
Sequentially rotated arrays with reduced sidelobe levels **MAP** p321
Tuning interactions of cascaded-frequency selective-slot arrays **MAP** p290
VHF antenna array processing: high accuracy direction finding and performance evaluation with real data **RSN** p137

ANTENNA THEORY

Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Algorithmic engineering in adaptive signal processing: worked examples **VIS** p19
Analysis of a dielectric resonator antenna in a cylindrical conducting cavity: HEM modes **MAP** p8
Analysis of offset dual-patch microstrip antenna **MAP** p523
Analysis of radiation from active microstrip antennas **MAP** p359
Axial slot antenna on an anisotropic dielectric-coated circular cylinder **MAP** p527
Characterisation of electromagnetically coupled superquadric loop antennas for mobile communications applications **MAP** p85
Design and performance of profiled dielectric loaded horns **MAP** p337
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Diffraction effects of a tape covering the gaps of a panelled 'compact range' operating at millimetre waves **MAP** p114
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Electromagnetic fields interpolation from nonuniform samples over spherical and cylindrical surfaces **MAP** p77
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
Full characterisation of varactor-loaded, probe-fed, rectangular, microstrip patch antennas **MAP** p367
General localised junction model in the analysis of wire-to-plate junctions **MAP** p1
Linear array geometry synthesis with minimum sidelobe level and null control **MAP** p162
Main-beam reduction for compact range imaging **MAP** p461
Millimetre-wave leaky-wave antennas based on slitted asymmetric ridge waveguides **MAP** p175
Modelling of straight thin wires using time-domain electric field integral equations **MAP** p123
Moment method solution of aperture-coupled hemispherical dielectric resonator antenna using exact modal Green's function **MAP** p377
Multiport network analysis of frequency-selective surfaces **MAP** p229
Numerical simulations for frequency-selective screens with complementary elements **MAP** p477
Offset Fresnel lens antenna **MAP** p517
Optimisation of radiation efficiency for a transverse ground-plane slot in boxed-stripline **MAP** p509
Performance of Zolotarev and modified-Zolotarev difference pattern array distributions **MAP** p37
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253
Sequentially rotated arrays with reduced sidelobe levels **MAP** p321
Simplified treatment of wire-to-plate junctions with magnetic-current frill excitation **MAP** p133
Survey of analytical and numerical models for probe-fed microstrip antennas **MAP** p15
Synthesis of vehicular antenna NVIS radiation patterns using the method of characteristic modes **MAP** p151
Tuning interactions of cascaded-frequency selective-slot arrays **MAP** p290

ARRAY SIGNAL PROCESSING

Algorithmic engineering in adaptive signal processing: worked examples **VIS** p19
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Autofocusing technique for adaptive coherent signal-subspace transformation beamformers **RSN** p30
Bayesian model selection applied to spatial signal processing **VIS** p76
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
DOA estimation method for unknown noise fields **RSN** p149
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
Fourth-order cumulant matrices for DOA estimation **RSN** p144
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Linear array geometry synthesis with minimum sidelobe level and null control **MAP** p162
Manifold interpolation for diversely polarised arrays **RSN** p19
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
Mode-space spatial spectral estimation for circular arrays **RSN** p300
Parameter identifiability problem in signal processing **RSN** p133
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256

Study of the detection and resolution capabilities of a one-dimensional array of sensors by using differential geometry **RSN** p83
VHF antenna array processing: high accuracy direction finding and performance evaluation with real data **RSN** p137

ATOMIC AND MOLECULAR MEASUREMENT

Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Laser-induced plasmas and resonance ionisation spectroscopies **SMT** p83

AUDIO EQUIPMENT

Differential-current derived feedback in error-correcting audio amplifier applications **CDS** p227
Error activity and error entropy as a measure of psychoacoustic significance in the perceptual domain **VIS** p203

AUTOMATA THEORY

Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Heterogeneous Petri net methodology for the design of complex controllers **CDT** p293
Petri-net-based algorithms for parallel-controller synthesis **CDT** p405
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229

AUTOMATIC TEST SYSTEMS

Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Experimental evaluation of capacitance tomographic flow imaging systems using physical models **CDS** p357
Knowledge-based systems for neuroelectric signal processing **SMT** p215
Multifrequency binary testing in measurement and control **SMT** p1
Real time hysteresis controller for relay testing **EPA** p71
Realtime fault detection and classification in power systems using microprocessors **GTD** p315
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95
Synthetic loading of three-phase induction motors by magnetic field magnitude modulation **EPA** p95
Synthetic loading of three-phase induction motors using microprocessor controlled power electronics **EPA** p101
Total control of fast coordinate measuring machines **CTA** p373

AUTOMOBILE ELECTRONICS

CMOS shunt regulator with bandgap reference for automotive environment **CDS** p157
Electromagnetic compatibility in the automotive environment **SMT** p252

BIOLOGICAL AND BIOMEDICAL SYSTEMS

Artificial neural network and spectrum analysis methods for detecting brain diseases from the CNV response in the electroencephalogram **SMT** p432
Conductivity and permittivity images from an induced current electrical impedance tomography system **SMT** p356
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Fourier coded-aperture imaging in nuclear medicine **SMT** p179
Ionisation of dielectric spheroid membranes: a balloon model of electroporation of biological cells **SMT** p190
Knowledge-based systems for neuroelectric signal processing **SMT** p215
Modelling of medical magnetic-resonance-imaging signals **VIS** p71
Modelling of the glass microelectrode tip **SMT** p391
Multiresolution morphological fusion of MR and CT images of the human brain **VIS** p137
Optical technique for measuring the positive and negative dielectrophoretic behaviour of cells and colloidal suspensions **SMT** p395
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70

BROADCASTING

Approximate analysis of a dynamic-channel-assignment scheme with handoffs **COM** p89
Development of the generic standards **SMT** p249
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Split spread-spectrum technique for flexible use of frequency bands **RSN** p65

CABLES AND OVERHEAD LINES

Asymmetrical three-phase load-flow study based on symmetrical component theory **GTD** p248
Dielectric strength of air insulation for coordination of minimum clearances of overhead lines: a review **SMT** p449
Effect of surface-temperature rise on external thermal resistance of single-core and multi-core bundled cables in still air **GTD** p215
Electromagnetic compatibility of building cables **SMT** p263
Frequency-dependent impedance of vertical conductors and a multiconductor tower model **GTD** p339
High-performance controllers for HVDC transmission links **GTD** p422
High-voltage insulation co-ordination: timelags of parallel-plate, rod-plane, rod-rod gaps, cap and pin insulators and surge diverter **GTD** p397
Hybrid AC superconducting current limiter: small-scale experimental model **GTD** p117
Maximum efficiency of interconnected transmission lines **GTD** p353
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 1: signal measurement **GTD** p133
Novel finite-element analysis of space-charge modified fields **SMT** p369
Tower modelling for lightning surge analysis using Electro-Magnetic Transients Program **GTD** p637

CALIBRATION

Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
Manifold interpolation for diversely polarised arrays **RSN** p19
Methodology for accurate free-space characterisation of radar absorbing materials **SMT** p538
New VHF impedance measuring instrument for UK national standard **SMT** p71
Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
One-step connection method for the measurement of N-port microwave networks using six-port techniques **MAP** p285
Self-calibratable voltage transformer with part-per-million accuracy **SMT** p379

CIRCUIT BREAKERS

Electrical arc ignition in narrow slots: high-voltage generation **GTD** p263
High-voltage expulsion fuses: energy dissipation and design goals **GTD** p205
High-voltage fuse behaviour with varistor commutation **GTD** p33
Ignition of an electrical arc in a capillary: arc parameters in the initial period **GTD** p480
Influence of humidity on the breakdown mechanism of medium length rod-plane gaps stressed by positive impulse voltages **SMT** p407
Metal vapour densities in a pseudospark switch **SMT** p148
Probabilistic approach to transient stability evaluation **GTD** p537
Relationship between circuit-breaker performance and nozzle blocking, contact evaporation and particle production **SMT** p508
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123

CIRCUIT CAD

Analysis of radiation from active microstrip antennas **MAP** p359
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Applying the controlled aliasing technique for fast prediction of the output response of nonlinear circuits driven by composite signals **CDS** p65
Automated technique for high-level circuit synthesis from temporal logic specifications **CDT** p145
Computer-aided design of an RF MOSFET power amplifier **CDS** p433
Design for testability of sequential circuits **CDT** p153
Equivalent circuit model for microstrip multiport radial dividers **MAP** p333
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
Optimised synthesis of delay-insensitive circuits using time-sharing **CDT** p111
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458
Response of externally excited coaxial cables with wire braided shields **SMT** p266
Simulation-based parameter extraction, its implementation and some applications **CDS** p129
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229

CIRCUIT COMPONENTS

Improved passive model for transient prediction of GaAs E/D MESFET analogue switches **CDS** p105
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123

CIRCUIT THEORY AND DESIGN

Active RC filter based on simulation of dissipative LC filters **CDS** p101
Analysis of radiation from active microstrip antennas **MAP** p359
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Applying the controlled aliasing technique for fast prediction of the output response of nonlinear circuits driven by composite signals **CDS** p65
Approach to the synthesis of canonic RC-active oscillators using CCII **CDS** p493
Automated technique for high-level circuit synthesis from temporal logic specifications **CDT** p145
Clock feedthrough analysis and cancellation in current sample/hold circuits **CDS** p510
Computer-aided design of an RF MOSFET power amplifier **CDS** p433
Current transistor-transistor-inductor oscillator **CDS** p498
Decomposition of logic networks with emphasis on signed digit arithmetic systems **CDS** p307
Design for testability of sequential circuits **CDT** p153
Design of digital FIR notch filters **VIS** p334
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Direct approach to design of PCAS filters with combined gain and phase specification **VIS** p161
Distributed system for VLSI layout compaction **CDT** p49
Efficient partitioning-based method to determine the upper bound on the number of operating points in transistor circuits **CDS** p258
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Equivalent circuit model for microstrip multiport radial dividers **MAP** p333
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
General area router based on planning techniques **CDT** p413
Generalised associated discrete circuit model for switching devices **SMT** p57
Genetic beam search for gate matrix layout **CDT** p123
High-fidelity FIR filters based on central-difference operators **CDS** p111
High-field effects in polysilicon thin-film transistors **CDS** p45
Implementing high-order continuity and rate dependence in SPICE models **CDS** p251

Improvement on the diagonal routing model **CDS** p535
Large signal periodic time-domain circuit simulation **CDS** p285
LLC-type series resonant convertor with PWM control **CDS** p73
Mathematical model of gate-turn-off thyristor for use in circuit simulations **EPA** p284
Modelling of arbitrarily shaped MMIC and hybrid planar circuits with a mixed waveguide model boundary integral method **MAP** p495
Modelling of propagation delays in the bilevel crossing interconnections on the GaAs-based integrated circuits **CDS** p185
Modular SPICE macromodel for operational amplifiers **CDS** p417
MOS analogue circuit simulation with SPICE **CDS** p265
Multiport network analysis of frequency-selective surfaces **MAP** p229
New analytical procedure for automatic cell placement in gate-arrays **CDS** p476
New global routing subsystem for CMOS gate arrays **CDS** p421
Noise analysis of second-order analogue active filters **CDS** p350
Optimisation efficiency in behavioural synthesis **CDS** p399
Optimised synthesis of delay-insensitive circuits using time-sharing **CDT** p111
Overview of SPICE-like circuit simulation algorithms **CDS** p242
Parametric yield optimisation of MOS VLSI circuits based on simulated annealing and its parallel implementation **CDS** p387
Performance characterisation of a microwave transistor **CDS** p337
Pole-parameter analysis: a novel approach for the design of filters **CDS** p121
Power-source element and its properties **CDS** p220
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458
Response of externally excited coaxial cables with wire braided shields **SMT** p266
Simulation-based parameter extraction, its implementation and some applications **CDS** p129
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229
Stride: a tool for formal interactive system synthesis **CDT** p347
Symbolic analysis of large-scale microwave networks **MAP** p433
Two-level partitioning algorithm with stable performance **CDS** p197

CLOSED LOOP SYSTEMS

Generalised discrete control system design method with control limit considerations **CTA** p39
Mixed H_∞ optimisation with model-matching **CTA** p329
New method of parametric eigenvalue assignment in state feedback control **CTA** p223
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
System identification based on closed-loop step response data **CTA** p107

CMOS INTEGRATED CIRCUITS

Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Clock feedthrough analysis and cancellation in current sample/hold circuits **CDS** p510
CMOS shunt regulator with bandgap reference for automotive environment **CDS** p157
CMOS triode-transistor transconductor for high-frequency continuous-time filters **CDS** p462
Current status and future prospects of poly-Si devices **CDS** p3
Design and operation of poly-Si analogue circuits **CDS** p60
Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Efficient parallel pipelinable VLSI architecture for finding the maximum binary number **CDS** p527
Integrated fourth-order $\Sigma\Delta$ convertor with stable self-tuning continuous-time noise shaper **CDS** p145
Matrix methods for the design of transconductor ladder filters **CDS** p89
MOS analogue circuit simulation with SPICE **CDS** p265
New global routing subsystem for CMOS gate arrays **CDS** p421
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
Testing differential split-level CMOS circuits **CDS** p451
Theoretical and experimental evaluation of high-voltage CMOS inverters **CDS** p162

CODES AND DECODING

Algorithms suitable for low complexity implementation of at class of runlength-limited error control codes **COM** p111
Alternative to NASA's concatenated coding system for the Galileo mission **COM** p229
Asymptotic bounds on the size of error-correcting recording codes **COM** p365
Bandwidth tradeoffs among coding, processing gain and modulation in frequency-hopped multiple access communications **COM** p63
Channel error profiles for DECT **COM** p413
Classified vector quantisation with variable block-size DCT models **VIS** p39
Coded modulation based on rings of integers modulo-q. 1. Block codes **COM** p129
Coded modulation based on rings of integers modulo-q. 2. Convolutional codes **COM** p137
Collaborative coding and decoding techniques for multiple access channel **COM** p56
Concatenated codes using multilevel structures for PSK signalling over the Rayleigh fading channel **COM** p233
Concurrent-error detection in high-speed carry-free dividers **CDT** p356
Decoding the (73, 37, 13) quadratic residue code **CDT** p253
Effect of line coding on heterodyne FSK optical systems with nonuniform laser FM response **OPT** p200
Enhanced channel coding using source criteria in speech coders **VIS** p191
Enhancing the security of El Gamal's signature scheme **CDT** p249
Error correction capabilities of binary mapped Reed-Solomon codes with parity bits appended to all symbols **COM** p209
Error performance for diversity DS-SSMA communications in fading channels **COM** p357
Fast closest codeword search algorithms for vector quantisation **VIS** p143
Fast sequential decoding algorithm based on dynamic searching strategy **COM** p312
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Generalised block-matching motion estimation using quad-tree structured spatial decomposition **VIS** p446
Group-oriented (t, n) threshold digital signature scheme and digital multisignature **CDT** p307
Hybrid threshold soft decision decoding algorithm **COM** p126
Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Improvement of noncoherent orthogonal coding by time overlapping **COM** p309
Low bitrate video coding with depth compensation **VIS** p149
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369
MLSE differential phase detection for M-ary DPSK **COM** p407
Montgomery reduction with even modulus **CDT** p314
Multiband linear predictive speech coding at very low bit rates **VIS** p289
Multilevel ternary line codes with trellis structure **COM** p7
New shortened subcodes of binary extended QR codes **COM** p2
Nonlinear cepstral equalisation method for noisy speech recognition **VIS** p397
Novel efficient approach for the design of equiripple quadrature mirror filters **VIS** p95
Parallel decoding of the [23, 12, 7] binary Golay code **CDT** p119
Performance analysis and sequence designs of synchronous code-division multiple-access systems with multimedia services **COM** p371
Performance analysis for a convolutionally coded DPSK meteor-burst communication system **COM** p223
Performance of joint trellis-coded quantisation/modulation with a Bayes receiver **COM** p13
Private-key encryption based on concatenation of codes **COM** p105
Public-key cryptosystem design based on factoring and discrete logarithms **CDT** p193
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Soft decision decoding of Reed-Solomon codes using trellis methods **COM** p303
Soft decision decoding techniques for a class of runlength-limited error control codes **COM** p118
Some new rotationally invariant TCM schemes for multidimensional M-PSK **COM** p143
Speaker-independent isolated word recognition using multiple hidden Markov models **VIS** p197
Testing for the convergence of a linear decision directed equaliser **VIS** p129
Threshold cryptosystem with multiple secret sharing policies **CDT** p142
Top down structured parallelisation of embedded image processing applications **VIS** p431
Trellis coded Q^2PSK signals. 2. Land mobile satellite fading channels **COM** p159
Trellis coded Q^2PSK signals. I. AWGN and nonlinear satellite channels **COM** p151
Trellis decoding technique for block RLL/ECC **COM** p297
Triple correlation analysis of binary sequences for codeword detection **VIS** p297
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

COMMUNICATION SYSTEM THEORY

Adaptive borrowing of ordered resources for the pan-European mobile communication (GSM) system **COM** p93
Analysis and simulation of multiple-ring token networks **CDT** p135
Analysis of out-of-sequence problem and preventative schemes in parallel switch architecture for high-speed ATM network **COM** p29
B-tree: a high-performance fault-tolerant ATM switch **COM** p20
Bandwidth tradeoffs among coding, processing gain and modulation in frequency-hopped multiple access communications **COM** p63
Capacity of a cellular time division duplex CDMA system **COM** p351
Channel error profiles for DECT **COM** p413
Collaborative coding and decoding techniques for multiple access channel **COM** p56
Connectivity properties of a random radio network **COM** p289
Design and performance analysis of input-output buffering delta-based ATM switch with backpressure mechanism **COM** p255
Design of a high performance nonblocking copy network for multicast ATM switching **COM** p317
Discrete queueing analysis of a star network **COM** p275
Effective erasure node algorithm for slot reuse in DQDB **COM** p196
Enhancing the security of El Gamal's signature scheme **CDT** p249
Error performance for diversity DS-SSMA communications in fading channels **COM** p357
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Fibre-based local area network with priority access **COM** p203
Frequency hopped spread spectrum multiple access over cellular dispersive fading channels **COM** p79
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
Multi-exponentiation [cryptographic protocols] **CDT** p325
New hybrid MAC-layer protocol for real-time bus networks **COM** p325
Performance analysis and sequence designs of synchronous code-division multiple-access systems with multimedia services **COM** p371
Performance analysis of a multicast packet switch with capacity m **COM** p177
Performance analysis of a slow FH/MFSK acquisition scheme in random partial band noise jamming **COM** p396
Priority mechanism for the DQDB network **COM** p98
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Testing for the convergence of a linear decision directed equaliser **VIS** p129
Transmission of compressed voice over integrated services frame relay networks: priority service and adaptive buildout delay **COM** p265

COMPUTATIONAL COMPLEXITY

Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Fast VLSI architectures using nonredundant multibit recoding for computing A^Y mod N **CDS** p345
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Message optimal fully decentralised evaluation of associative and commutative functions **CDT** p238
Minimisation of control store width in digital systems **CDT** p243
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369
MLSE differential phase detection for M-ary DPSK **COM** p407

Non-analytic object recognition using the Hough transform with the matching technique **CDT** p11
Numerical robustness and efficiency of generalised predictive control algorithms with guaranteed stability **CTA** p154
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
Parallel decoding of the [23, 12, 7] binary Golay code **CDT** p119
Performance evaluation of BIN/ABIN networks in buffered/unbuffered packet-switched environments **CDT** p29
Performance of joint trellis-coded quantisation/modulation with a Bayes receiver **COM** p13
Public-key cryptosystem design based on factoring and discrete logarithms **CDT** p193
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

COMPUTER APPLICATIONS

A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Algorithmic engineering in adaptive signal processing: worked examples **VIS** p19
Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
Comparison between two formulations in terms of potential for the coupling of magnetic and electric circuit equations **SMT** p486
Differential transmission of evolution measures in SCADA systems **GTD** p253
Experimental evaluation of capacitance tomographic flow imaging systems using physical models **CDS** p357
Highly stable power supply using digitally controlled phase-controlled rectifier and active filter **EPA** p221
Integrated digital power transformer protection **GTD** p323
Intelligent operation of distribution network **GTD** p106
Knowledge-based systems for neuroelectric signal processing **SMT** p215
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Multifrequency binary testing in measurement and control **SMT** p1
Multivariable adaptive control of AC-DC systems **GTD** p658
New technique of network partitioning for voltage collapse margin calculations **GTD** p630
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Power system network topology error detection **GTD** p623
Real time hysteresis controller for relay testing **EPA** p71
Realtime fault detection and classification in power systems using microprocessors **GTD** p315
Robot path planning using VLSI resistive grids **VIS** p267
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70
Synthetic loading of three-phase induction motors by magnetic field magnitude modulation **EPA** p95
Synthetic loading of three-phase induction motors using microprocessor controlled power electronics **EPA** p101
Top down structured parallelisation of embedded image processing applications **VIS** p431
Total control of fast coordinate measuring machines **CTA** p373
Travelling wave excitation of nonlinear magnetic materials of significant conductivity **SMT** p499
Vision-based gauge for online weld profile metrology **SMT** p521
Voltage reactive security analysis in power systems with automatic secondary voltage control **GTD** p177

COMPUTER COMMUNICATIONS

Analysis and simulation of multiple-ring token networks **CDT** p135
Conceptual survey of phase modulation based wavelength registered networks **OPT** p53
Effective erasure node algorithm for slot reuse in DQDB **COM** p196
Fibre-based local area network with priority access **COM** p203
New hybrid MAC-layer protocol for real-time bus networks **COM** p325
Priority mechanism for the DQDB network **COM** p98
Two-centre tree topologies for metropolitan area networks **COM** p280

CONTROL SYSTEM ANALYSIS

Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Extension of the covariance control principle to nonlinear stochastic systems **CTA** p93
Global robust adaptive control of power systems **GTD** p429
GMV technique for nonlinear control with neural networks **CTA** p57
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
When can the decentralised state feedback be realised as a static output feedback? **CTA** p104

CONTROL SYSTEM SYNTHESIS

Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Advanced aircraft flight control using nonlinear inverse dynamics **CTA** p418
Decoupling design of multivariable generalised predictive control **CTA** p197
Design of universal variable-structure controller for dynamic stabilisation of power systems **GTD** p363
Exponentially stable robust control law for robot manipulators **CTA** p389
Feedforward time-delay structures in state estimation: finite memory smoothing and continuous deadbeat observers **CTA** p121
Generalised discrete control system design method with control limit considerations **CTA** p39
Heterogeneous Petri net methodology for the design of complex controllers **CDT** p293
LLC-type series resonant convertor with PWM control **CDS** p73
Mixed H_∞ optimisation with model-matching **CTA** p329
Neural-net controller for nonlinear plants: design approach through linearisation **CTA** p315
New robust adaptive load-frequency control with system parametric uncertainties **GTD** p184
Optimally decoupled robust control of MIMO plants with multiple delays **CTA** p25
PID controller design for a TITO system **CTA** p111
Power system stabilisation using the dominant subsystem principle **GTD** p243
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Simultaneous robust stabilisation of two normalised coprime factor plant balls **CTA** p191
Total control of fast coordinate measuring machines **CTA** p373

CONVERTORS

Acoustic noise of electromagnetic origin in an ideal frequency-converter-driven induction motor **EPA** p341
Analysis and control of torque ripples in inverter-fed permanent-magnet synchronous motors using the electromechanical spring-stiffness coefficient $\partial T_e/\partial\theta$ **EPA** p169
Analysis and implementation of a full-bridge constant-frequency LCC-type parallel resonant converter **EPA** p121
Analysis of GTO-based static VAr compensators **EPA** p293
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Cost-effectiveness of hybrid and unified compensators of nonactive power in networks **EPA** p39
Effects of harmonic distortion of the supply voltage on the optimum performance of a thyristor controlled reactor-type compensator **SMT** p15
Empirical thermal model for inverter-driven cage induction machines **EPA** p360
Field-weakening performance of brushless synchronous AC motor drives **EPA** p331
Generalised convertor models for iterative harmonic analysis in power systems **GTD** p445
Highly stable power supply using digitally controlled phase-controlled rectifier and active filter **EPA** p221
Improvement of induction machine stability by modulation techniques **EPA** p347
LLC-type series resonant convertor with PWM control **CDS** p73
Losses in PWM inverters using IGBTs **EPA** p235
Mathematical model of gate-turn-off thyristor for use in circuit simulations **EPA** p284
Negative-phase-sequence reduction with adjacent static reactive-power compensators **EPA** p259
New approach to current control of AC-to-DC voltage-type convertors **EPA** p275
Optimal-current control of convertor-fed DC motors. I. Special case for continuous current with negligible resistance **EPA** p240
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Parameter identification of inverter drive system **EPA** p303
Real time hysteresis controller for relay testing **EPA** p71
Self-load bank for UPS testing by circulating current method **EPA** p191
Simulated annealing in the analysis of resonant DC link inverters **EPA** p163
Single-phase step-up/down current-source rectifier with suppressed resonance **EPA** p19
Single-phase three-wire transformerless inverter **EPA** p197
Step-up/down three-phase AC to DC convertor with sinusoidal input current and unity power factor **EPA** p77
Thyristor controlled susceptances for balancing compensators operated under nonsinusoidal conditions **EPA** p177
Voltage stability assessment of isolated power systems with power electronic converters **GTD** p310

CYBERNETICS AND ROBOTICS

Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
Exponentially stable robust control law for robot manipulators **CTA** p389
Extraction and computation of identifiable parameters in robot dynamic models: theory and application **CTA** p48
Knowledge-based systems for neuroelectric signal processing **SMT** p215
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Robot path planning using VLSI resistive grids **VIS** p267
Self tuning of computed torque gains by using neural networks with flexible structures **CTA** p235
Vision-based gauge for online weld profile metrology **SMT** p521

DATA COMMUNICATION

Analysis and simulation of multiple-ring token networks **CDT** p135
Effective erasure node algorithm for slot reuse in DQDB **COM** p196
Enhancing the security of El Gamal's signature scheme **CDT** p249
Fibre-based local area network with priority access **COM** p203
Flexibility in interface development **CDT** p93
Message optimal fully decentralised evaluation of associative and commutative functions **CDT** p238
Multi-exponentiation [cryptographic protocols] **CDT** p325
New hybrid MAC-layer protocol for real-time bus networks **COM** p325
Performance of scheduling algorithms for channel reservation **CDT** p341
Priority mechanism for the DQDB network **COM** p98
Two-centre tree topologies for metropolitan area networks **COM** p280

DATA HANDLING

Computer aided design for teaching modern optics to electronic engineering undergraduates **SMT** p171
Implementation of dynamic look-up tables **CDT** p391

Table driven Newton scheme for high precision logarithm generation **CDT** p281
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33

DATA SECURITY

Analysis and improvement of an access control scheme with user authentication **CDT** p271
Enhancing the security of El Gamal's signature scheme **CDT** p249
Group-oriented (t, n) threshold digital signature scheme and digital multisignature **CDT** p307
Identity-based conference key broadcast systems **CDT** p57
Interleaving security and efficiency considerations in the design of inexpensive IC cards **CDT** p265
Montgomery reduction with even modulus **CDT** p314
Multi-exponentiation [cryptographic protocols] **CDT** p325
Public-key cryptosystem design based on factoring and discrete logarithms **CDT** p193
Threshold cryptosystem with multiple secret sharing policies **CDT** p142

DIELECTRIC MATERIALS AND DEVICES

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Active antenna top-cover frequency pulling effects **MAP** p374
Analysis of a dielectric resonator antenna in a cylindrical conducting cavity: HEM modes **MAP** p8
Electrically controlled HTSC/ferroelectric coplanar waveguide **MAP** p501
Electromagnetic imaging of infinite dielectric cylinders using a modified Born approximation and including a priori information on the unknown cross sections **MAP** p445
Microstrip with dielectric overlay: variational analysis and validation **MAP** p138
Moment method solution of aperture-coupled hemispherical dielectric resonator antenna using exact modal Green's function **MAP** p377
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Robust trajectory tracking for flexible piezoelectric structures **CTA** p289

DIGITAL ARITHMETIC

Constant integer multiplication using minimum adders **CDS** p407
Decomposition of logic networks with emphasis on signed digit arithmetic systems **CDS** p307
Design of residue generators and multioperand adders modulo 3 built of multioutput threshold circuits **CDT** p129
Division unit with Newton-Raphson approximation and digit-by-digit refinement of the quotient **CDT** p317
Efficient parallel pipelinable VLSI architecture for finding the maximum binary number **CDS** p527
Fast VLSI architectures using nonredundant multibit recoding for computing A^Y mod N **CDS** p345
Parallel design of arithmetic coding **CDT** p327
Radix-2 FFT-pipeline architecture with reduced noise-to-signal ratio **VIS** p81
Radix digit-serial pipelined divider/square-root architecture **CDT** p375
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
Systolic implementation of FIR decimators and interpolators **CDS** p489
Table driven Newton scheme for high precision logarithm generation **CDT** p281
Ultrafast pipelined arithmetic using quantum electronic devices **CDT** p104

DIGITAL ELECTRONICS

Analogue- and binary-to-residue conversion schemes **CDS** p135
Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Fast VLSI architectures using nonredundant multibit recoding for computing A^Y mod N **CDS** p345
Hot carrier effects in devices and circuits formed from poly-Si **CDS** p38
Integrated fourth-order $\Sigma\Delta$ convertor with stable self-tuning continuous-time noise shaper **CDS** p145
New high accuracy pulse width modulation based digital-to-analogue convertor/power amplifier **CDS** p315
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
Radix-2 FFT-pipeline architecture with reduced noise-to-signal ratio **VIS** p81
Radix digit-serial pipelined divider/square-root architecture **CDT** p375
Real time hysteresis controller for relay testing **EPA** p71
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
Structure of round-off noise in single-bit second-order sigma-delta modulators with zero input **VIS** p107

DIGITAL FILTERS

Bit-serial digital filter architecture using RAM-based delay operators **CDS** p371
Design of digital FIR notch filters **VIS** p334
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Direct approach to design of PCAS filters with combined gain and phase specification **VIS** p161
FIR filter order reduction: balanced model truncation and Hankel-norm optimal approximation **VIS** p168
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
High-fidelity FIR filters based on central-difference operators **CDS** p111
Multiplier-less FIR filter design using a genetic algorithm **VIS** p175
Nonlinear echo cancelling using look-up tables and Volterra systems **VIS** p357
Novel approach to the design of I/Q demodulation filters **VIS** p154
Novel efficient approach for the design of equiripple quadrature mirror filters **VIS** p95
Systolic implementation of FIR decimators and interpolators **CDS** p489
Variable digital filter design using the outer product expansion **VIS** p123

DIGITAL TECHNIQUES

Fast VLSI architectures using nonredundant multibit recoding for computing A^Y mod N **CDS** p345
Minimisation of control store width in digital systems **CDT** p243

DISCRETE SYSTEMS

Adaptive control of discrete systems using neural networks **CTA** p209
Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Criteria for stability of zeros of sampled systems **CTA** p396
Generalised discrete control system design method with control limit considerations **CTA** p39
GMV technique for nonlinear control with neural networks **CTA** p57
New stability results for 2-D discrete systems based on the Fornasini-Marchesini state space model **CDS** p427
Sampling-time effects of higher-order digitisations and their applications in digital redesign **CTA** p83

DISTRIBUTED PARAMETER SYSTEMS

Decoupling design of multivariable generalised predictive control **CTA** p197
Feedforward time-delay structures in state estimation: finite memory smoothing and continuous deadbeat observers **CTA** p121
New stability results for 2-D discrete systems based on the Fornasini-Marchesini state space model **CDS** p427
Online system identification using Laguerre series **CTA** p249
Optimally decoupled robust control of MIMO plants with multiple delays **CTA** p25
Robust stabilisation for a class of time-delay nonlinear systems **CTA** p285
Robust trajectory tracking for flexible piezoelectric structures **CTA** p289

EDDY CURRENTS

Complementarity between the energy results of H and E formulations in eddy-current problems **SMT** p25
Travelling wave excitation of nonlinear magnetic materials of significant conductivity **SMT** p499

EDUCATION AND TRAINING

Computer aided design for teaching modern optics to electronic engineering undergraduates **SMT** p171
Microway: a structured design exercise for teaching microprocessor applications **SMT** p547
Multifrequency binary testing in measurement and control **SMT** p1
Present state of electromagnetic compatibility education and prospects for the future **SMT** p259

ELECTRIC DISCHARGES

Application of ultrasound to the NDT of solid insulation **SMT** p20
Characterising the discharge development due to surface contamination in GIS using the UHF technique **SMT** p118
Corona space charge development for combined alternating and direct voltage excitation **SMT** p441
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Dielectric strength of air insulation for coordination of minimum clearances of overhead lines: a review **SMT** p449
Electrical arc ignition in narrow slots: high-voltage generation **GTD** p263
Influence of humidity on the breakdown mechanism of medium length rod-plane gaps stressed by positive impulse voltages **SMT** p407
Laser-induced plasmas and resonance ionisation spectroscopies **SMT** p83
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
Location of impact points in the impulse flashover of air from a pointed electrode **SMT** p165
Novel finite-element analysis of space-charge modified fields **SMT** p369
Paraxial corona discharge. I. Review, instrumentation and experiments **SMT** p197
Paraxial corona discharge. II. Simulation and analysis **SMT** p205
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123
Use of an ion energy analyser-mass spectrometer to measure ion kinetic-energy distributions from RF discharges in argon-helium gas mixtures **SMT** p105

ELECTRO-OPTICAL DEVICES

Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Laser beam modulator of partially loaded microstrip line structure **OPT** p145
Modified Pockels sensor for electric-field measurements **SMT** p481
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
Optical modulators using fibreoptic Sagnac interferometers **OPT** p1
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Predicted performance of Franz-Keldysh effect optical reflection modulators and comparisons with similar multiple quantum well-based devices **OPT** p257
Study on Kerr electro-optic field measurement method for nonuniform three-dimensional electric field **SMT** p418
Travelling wave electrode optimisation for high speed electro-optic modulators using the Fourier series method **OPT** p381

ELECTROMAGNETIC COMPATIBILITY

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Advances in design for EMC **SMT** p293
Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Development of the generic standards **SMT** p249
Electromagnetic compatibility in Europe **SMT** p238
Electromagnetic compatibility in the automotive environment **SMT** p252
Electromagnetic compatibility of building cables **SMT** p263
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Electromagnetic modelling for EMC using finite methods **SMT** p303

Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
FDTD evaluation of scattering by metallic objects in GTEM cells **SMT** p287
Prediction and measurement of EMC radiated immunity problems in interconnected digital electronic systems **SMT** p464
Present state of electromagnetic compatibility education and prospects for the future **SMT** p259
Recent developments in measurement techniques for use in screened rooms **SMT** p273
UK implementation of the EMC Directive **SMT** p234

ELECTROMAGNETIC INTERFERENCE

Development of the generic standards **SMT** p249
Electromagnetic compatibility in the automotive environment **SMT** p252
Improved methods for prediction of electromagnetic noise radiated by electrical machines **EPA** p109
Lightning-originated tangential electric field across air-soil interfaces **SMT** p65
Prediction and measurement of EMC radiated immunity problems in interconnected digital electronic systems **SMT** p464
Response of externally excited coaxial cables with wire braided shields **SMT** p266

ELECTROMAGNETIC THEORY

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Advances in design for EMC **SMT** p293
Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Autofocusing technique for adaptive coherent signal-subspace transformation beamformers **RSN** p30
Automatic detection and elimination of periodic pulse shaped interferences in partial discharge measurements **SMT** p335
Circular depolarisation ratio of radar returns from rain: validity of the second-order solution of RT equation **MAP** p257
Coherent processing of ultra-wideband radar signals **RSN** p171
Description of radar targets using the bispectrum **RSN** p159
Development of the generic standards **SMT** p249
Diffraction effects of a tape covering the gaps of a panelled 'compact range' operating at millimetre waves **MAP** p114
Edge-wave diffraction for flat-plate structures **MAP** p30
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Electromagnetic compatibility in Europe **SMT** p238
Electromagnetic compatibility in the automotive environment **SMT** p252
Electromagnetic compatibility of building cables **SMT** p263
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Electromagnetic fields interpolation from nonuniform samples over spherical and cylindrical surfaces **MAP** p77
Electromagnetic imaging of infinite dielectric cylinders using a modified Born approximation and including a priori information on the unknown cross sections **MAP** p445
Electromagnetic modelling for EMC using finite methods **SMT** p303
Electromagnetic scattering by an impedance cylinder coated eccentrically with a chiroplasma cylinder **MAP** p279
EM wave scattering by a dihedral strip grating **MAP** p155
Environmental coupling loss effects in superconducting HF loop antenna design **MAP** p94
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
FDTD evaluation of scattering by metallic objects in GTEM cells **SMT** p287
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
Graphical study of Laguerre-Gaussian beam modes **MAP** p145
Green dyadic and dipole fields for a medium with anisotropic chirality **MAP** p211
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
GTD fields at shadow and reflection boundaries of a polygonal cylinder **MAP** p232
Improved methods for prediction of electromagnetic noise radiated by electrical machines **EPA** p109
Integral equations for EM scattering by homogeneous/inhomogeneous two-dimensional chiral bodies **MAP** p385
Main-beam reduction for compact range imaging **MAP** p461
Medium PRF set selection: an approach through combinatorics **RSN** p307
Method of partial overlapping regions for the analysis of diffraction problems **MAP** p196
Methodology for accurate free-space characterisation of radar absorbing materials **SMT** p538
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Multiport network analysis of frequency-selective surfaces **MAP** p229
New frequency-domain TLM method for the numerical solution of steady-state electromagnetic problems **SMT** p310
Novel differential formulation of electromagnetic scattering by dielectric cylinders of arbitrary cross-section **MAP** p189
Numerical simulations for frequency-selective screens with complementary elements **MAP** p477
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Plane-wave diffraction by a two-part impedance strip **SMT** p383
Prediction and measurement of EMC radiated immunity problems in interconnected digital electronic systems **SMT** p464
Prediction of attenuation on satellite-Earth links for systems operating with low fade margins **MAP** p467
Present state of electromagnetic compatibility education and prospects for the future **SMT** p259
Recent developments in measurement techniques for use in screened rooms **SMT** p273
Response of externally excited coaxial cables with wire braided shields **SMT** p266
Scattered field analysis of a focused reflector using the Gabor series **MAP** p216
Scattering from a dielectric circular cylinder partially clad by a perfect electric conductor **MAP** p536
Split spread-spectrum technique for flexible use of frequency bands **RSN** p65
Theoretical study of the evaporation duct effects on satellite-to-ship radio links near the horizon **MAP** p272
UK implementation of the EMC Directive **SMT** p234
Use of radiometers in atmospheric attenuation measurements **MAP** p428

ELECTROMAGNETISM

Analytic approach to magnetic circuit for saturated axial-field induction machines **EPA** p27
Back-EMF waveforms and core losses in brushless DC motors **EPA** p144
Calculation of winding losses in high-frequency toroidal inductors using single strand conductors **EPA** p52
Comparison between two formulations in terms of potential for the coupling of magnetic and electric circuit equations **SMT** p486
Complementarity between the energy results of H and E formulations in eddy-current problems **SMT** p25
Diakoptics for electrostatics **SMT** p317
Eddy current add-on for frequency dependent representation of winding losses in transformer models used in computing electromagnetic transients **GTD** p209
Eddy current losses of permanent magnet motors **EPA** p7
Edge-wave diffraction for flat-plate structures **MAP** p30
Effect of end core flux on the performance of the switched reluctance motor **EPA** p308
Effect of radial rotor ventilation ducts on cage motor equivalent circuit parameters **EPA** p155
Efficient evaluation of singular and infinite integrals using the tanh transformation **MAP** p464
Electric field created by a circumferential sinusoidal charge-density wave on the surface of a cylinder **SMT** p400
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Electromagnetic fields interpolation from nonuniform samples over spherical and cylindrical surfaces **MAP** p77
EM wave scattering by a dihedral strip grating **MAP** p155
Expansion of an arbitrary field in terms of waveguide modes **OPT** p16
Field-weakening performance of brushless synchronous AC motor drives **EPA** p331
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
Graphical study of Laguerre-Gaussian beam modes **MAP** p145
Green dyadic and dipole fields for a medium with anisotropic chirality **MAP** p211
GTD fields at shadow and reflection boundaries of a polygonal cylinder **MAP** p232
Integral equations for EM scattering by homogeneous/inhomogeneous two-dimensional chiral bodies **MAP** p385
Lightning-originated tangential electric field across air-soil interfaces **SMT** p65
Linear ball-bearing motor **SMT** p224
Magnetic field analysis of asymmetrical machines by finite element method **GTD** p53
Method of partial overlapping regions for the analysis of diffraction problems **MAP** p196
Modelling of straight thin wires using time-domain electric field integral equations **MAP** p123
New frequency-domain TLM method for the numerical solution of steady-state electromagnetic problems **SMT** p310
Novel differential formulation of electromagnetic scattering by dielectric cylinders of arbitrary cross-section **MAP** p189
Novel finite-element analysis of space-charge modified fields **SMT** p369
Numerical simulations for frequency-selective screens with complementary elements **MAP** p477
Paraxial corona discharge. I. Review, instrumentation and experiments **SMT** p197
Paraxial corona discharge. II. Simulation and analysis **SMT** p205
Plane-wave diffraction by a two-part impedance strip **SMT** p383
Resonant frequencies and Q-factors of a spherical cavity loaded by an eccentric dielectric sphere **MAP** p342
Reversal of bounds in some dual-bound resistance calculations **SMT** p429
Scattering from a dielectric circular cylinder partially clad by a perfect electric conductor **MAP** p536
Study on Kerr electro-optic field measurement method for nonuniform three-dimensional electric field **SMT** p418
Surface winding for moving small conducting particles **SMT** p229
Travelling wave excitation of nonlinear magnetic materials of significant conductivity **SMT** p499

ELECTRONIC CIRCUITS

Capacitance of circularly symmetric via for microstrip transmission line **MAP** p265
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Microstrip with dielectric overlay: variational analysis and validation **MAP** p138
Modelling of arbitrarily shaped MMIC and hybrid planar circuits with a mixed waveguide model boundary integral method **MAP** p495

ELECTRORHEOLOGY

Experimental investigation into the electrical modeling of electrorheological fluids in the shear mode **SMT** p531

ENERGY CONVERSION

Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521

ERRORS AND ERROR ANALYSIS

Multilevel ternary line codes with trellis structure **COM** p7
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237

Performance analysis for a convolutionally coded DPSK meteor-burst communication system **COM** p223

EXPERT SYSTEMS

Flexibility in interface development **CDT** p93
Forecasting daily load curves using a hybrid fuzzy-neural approach **GTD** p561
Intelligent operation of distribution network **GTD** p106
Knowledge-based systems for neuroelectric signal processing **SMT** p215
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
Relationship between user models in HCI and AI **CDT** p99
Representation and use of task knowledge in a user interface design environment **CDT** p79

FEEDBACK

Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Analysis of a composite amplifier technique for optimum noise performance **CDS** p210
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Carrier-free radar signal design with MTI Doppler processor **RSN** p59
Differential-current derived feedback in error-correcting audio amplifier applications **CDS** p227
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Intensity noise and linewidth characteristics of laser diodes with phase conjugate optical feedback **OPT** p103
Multilevel quantisation and fusion scheme for the decentralised detection of an unknown signal **RSN** p37
Necessary conditions for limit cycles in multiloop relay systems **CTA** p163
New method of parametric eigenvalue assignment in state feedback control **CTA** p223
New sequential design procedures for multivariable systems based on Gauss-Jordan factorisation **CTA** p427
Noise analysis of second-order analogue active filters **CDS** p350
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Robust stabilisation for a class of time-delay nonlinear systems **CTA** p285
Single-phase three-wire transformerless inverter **EPA** p197
When can the decentralised state feedback be realised as a static output feedback? **CTA** p104

FIBRE LASERS

Optimum design of Er^{3+} doped fluoride fibre amplifiers, pumped at 820 nm and 1480 nm **OPT** p167

FIBRE OPTICS

Analysis of linearly polarised modes in elliptical-core fibre **OPT** p356
Depressed cladding single-mode fibres for 1300 nm operation **OPT** p157
Design procedures for passive planar coupled waveguide devices **OPT** p231
Direct determination of main fibre Bragg grating parameters using OLCR **OPT** p141
Fabrication tolerances in fibre directional couplers designed to maximise coupling between fibres and diode lasers **OPT** p69
Fibre optic probe for determining the thickness of immiscible layers **OPT** p275
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Low-loss fibre-matched diluted multiple quantum well waveguides **OPT** p296
Matching of single-mode fibre to laser diode by microlenses at 1.5 μm wavelength **OPT** p178
Optical modulators using fibreoptic Sagnac interferometers **OPT** p1
Optimum design of Er^{3+} doped fluoride fibre amplifiers pumped at 820 nm and 1480 nm **OPT** p167
Optimum prechirping conditions of externally modulated lasers for transmission on standard fibre **OPT** p363
Polarisation-dependent coupling in twin-core fibres with arbitrary elliptical cores **OPT** p43
Practical Sagnac interferometer based fibre optic current sensor **OPT** p249
Radiation modes of a fibre part 1: construction and properties **OPT** p287
Single Mueller matrix description of the propagation of degree of polarisation in a uniformly anisotropic single-mode optical fibre **OPT** p367
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123
Spun linear birefringence fibres and their sensing mechanism in current sensors with temperature compensation **OPT** p373

FILTERS AND FILTERING

Active RC filter based on simulation of dissipative LC filters **CDS** p101
Approach to the synthesis of canonic RC-active oscillators using CCII **CDS** p493
CMOS triode-transistor transconductor for high-frequency continuous-time filters **CDS** p462
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Explicit formula for harmonic distortion in SC filters with weakly nonlinear capacitors **CDS** p505
Frequency dependent transmission line loss in quasitransversal microwave filters **MAP** p402
Highly stable power supply using digitally controlled phase-controlled rectifier and active filter **EPA** p221
Leap-frog circuit compensating influence of GB product and second pole of operational amplifier **CDS** p203
Matrix methods for the design of transconductor ladder filters **CDS** p89
New single-phase active power filter **EPA** p129
Noise analysis of second-order analogue active filters **CDS** p350
One-step connection method for the measurement of N-port microwave networks using six-port techniques **MAP** p285
Pole-parameter analysis: a novel approach for the design of filters **CDS** p121
Pole placement algorithm for equiripple bandstop filter design **CDS** p325
Versatile voltage-controlled impedance configuration **CDS** p414

FORMAL LOGIC

Automated technique for high-level circuit synthesis from temporal logic specifications **CDT** p145
Complete processing system that uses fuzzy logic for ship detection in SAR images **RSN** p181
Constant-division algorithms **CDT** p334
Dual forms of Reed-Muller expansions **CDT** p184
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369

GENERATORS

Back-EMF waveforms and core losses in brushless DC motors **EPA** p144
DC motors with high-critical-temperature superconducting field winding and slotless armature **EPA** p135
Eddy current losses of permanent magnet motors **EPA** p7
Genetic and genetic/simulated-annealing approaches to economic dispatch **GTD** p507
Linear ball-bearing motor **SMT** p224
Magnetic and loss characteristics of nonoriented silicon-iron under unconventional conditions **SMT** p75
Magnetic field analysis of asymmetrical machines by finite element method **GTD** p53
Multivariable adaptive control of AC-DC systems **GTD** p658
Optimal-current control of convertor-fed DC motors. I. Special case for continuous current with negligible resistance **EPA** p240
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Parameter identification of inverter drive system **EPA** p303
Power based algorithm to provide loss of grid protection for embedded generation **GTD** p640
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Surface winding for moving small conducting particles **SMT** p229
Travelling wave excitation of nonlinear magnetic materials of significant conductivity **SMT** p499
Voltage stability as affected by discrete changes in the topology of power networks **GTD** p346

HISTORY

Impact of technology on the defeat of the U-boat September 1939-May 1943 **SMT** p343

HOLOGRAPHY

Precision of radio reflector surfaces adjusted from theodolite-tape measurements **MAP** p23

INDUCTION MOTORS

Acoustic noise of electromagnetic origin in an ideal frequency-converter-driven induction motor **EPA** p341
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Analytic approach to magnetic circuit for saturated axial-field induction machines **EPA** p27
Design of an energy efficient motor for irrigation pumps operating under realistic conditions **EPA** p269
Effect of radial rotor ventilation ducts on cage motor equivalent circuit parameters **EPA** p155
Electric field created by a circumferential sinusoidal charge-density wave on the surface of a cylinder **SMT** p400
Empirical thermal model for inverter-driven cage induction machines **EPA** p360
Feasibility of using unsupervised learning, artificial neural networks for the condition monitoring of electrical machines **EPA** p317
Improved methods for prediction of electromagnetic noise radiated by electrical machines **EPA** p109
Improvement of induction machine stability by modulation techniques **EPA** p347
Modelling and output power optimisation of a wind turbine driven double output induction generator **EPA** p33
Parameter sensitivity of procedures for on-line adaptation of the rotor time constant of induction machines with field oriented control **EPA** p353
Surface winding for moving small conducting particles **SMT** p229
Synthetic loading of three-phase induction motors by magnetic field magnitude modulation **EPA** p95
Synthetic loading of three-phase induction motors using microprocessor controlled power electronics **EPA** p101

INFORMATION THEORY

Adaptive allpass filtering for nonminimum-phase system identification **VIS** p373
Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Asymptotic bounds on the size of error-correcting recording codes **COM** p365
Bayesian model selection applied to spatial signal processing **VIS** p76
Comparison of known signal detection schemes under a weakly dependent noise model **VIS** p303
Complex gradient and Hessian **VIS** p380
Critical distance and the performance of sensor array geometries **RSN** p333
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Decoding the (73, 37, 13) quadratic residue code **CDT** p253
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Estimation of model error for nonlinear system identification **CTA** p403
Explicit estimation of speech boundaries **SMT** p153
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Fast time-series adaptive-filtering algorithm based on the QRD inverse-updates method **VIS** p325
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249

FIR filter order reduction: balanced model truncation and Hankel-norm optimal approximation **VIS** p168
Fractal model of a one-dimensional discrete signal and its implementation **VIS** p318
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
Generalised likelihood-ratio detection of multiple-hop frequency-hopping signals **COM** p70
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Hermite sieve as a wavelet-like array for 1D and 2D signal decomposition **VIS** p348
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
MLSE differential phase detection for M-ary DPSK **COM** p407
Mode-space spatial spectral estimation for circular arrays **RSN** p300
Multisensor, multisite tracking filter **RSN** p75
New method for the simulation of correlated K-distributed clutter **RSN** p53
Novel efficient approach for the design of equiripple quadrature mirror filters **VIS** p95
Parallel decoding of the [23, 12, 7] binary Golay code **CDT** p119
Parameter identifiability problem in signal processing **RSN** p133
Public-key cryptosystem design based on factoring and discrete logarithms **CDT** p193
Recursive single-most-likely-replacement channel equaliser **VIS** p185
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Statistical analysis of state-space approach in harmonic retrieval **VIS** p181
Study of the detection and resolution capabilities of a one-dimensional array of sensors by using differential geometry **RSN** p83
Testing for the convergence of a linear decision directed equaliser **VIS** p129
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Variable digital filter design using the outer product expansion **VIS** p123
Variable-step-size LMS algorithm: new developments and experiments **VIS** p311

INSTRUMENTATION AND MEASUREMENT

Aircraft geometric height computation using secondary surveillance radar range differences **RSN** p119
Application of ultrasound to the NDT of solid insulation **SMT** p20
Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
Characterising the performance of a confocal acoustic microscope **SMT** p48
Circular depolarisation ratio of radar returns from rain: validity of the second-order solution of RT equation **MAP** p257
Considerations for accurate voxel positioning on a rotating-screen volumetric display system **OPT** p336
Current status and future prospects of poly-Si devices **CDS** p3
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Differential-current derived feedback in error-correcting audio amplifier applications **CDS** p227
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Fourier coded-aperture imaging in nuclear medicine **SMT** p179
Growler detection in sea clutter using Gaussian spectrum models **RSN** p285
High frequency and high resolution capacitance measuring circuit for process tomography **CDS** p215
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Investigation of new narrow-bandwidth a-Si:H photodetector **OPT** p150
Jitter in the square synchroniser on direct detection optical communications. Part 1: theoretical analysis **OPT** p209
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
Low-power optical current measurement system employing a hybrid transmitter **SMT** p129
Methodology for accurate free-space characterisation of radar absorbing materials **SMT** p538
Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
One-step connection method for the measurement of N-port microwave networks using six-port techniques **MAP** p285
Optical modulators using fibreoptic Sagnac interferometers **OPT** p1
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
Practical Sagnac interferometer based fibre optic current sensor **OPT** p249
Pulse-echo scattering in solids with nonuniform transducers **SMT** p363
Self-load bank for UPS testing by circulating current method **EPA** p191
Some investigations on neural processing of scattered light in water quality assessment **VIS** p261
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123
Spun linear birefringence fibres and their sensing mechanism in current sensors with temperature compensation **OPT** p373
Switching system for single antenna operation of an S-band FMCW radar **RSN** p241
Thermometry of lossy microstriplines by correlation radiometry **MAP** p307
Vision-based gauge for online weld profile metrology **SMT** p521

INSULATED GATE FIELD EFFECT TRANSISTORS

Analytical extraction method for submicron MOS transistor model parameters in the linear region **CDS** p457
Current status and future prospects of poly-Si devices **CDS** p3
Degradation in on-state characteristics of IGBTs through self-heating **CDS** p439
Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Effect of X-ray irradiation on submicrometre channel length MOSFETs **CDS** p193
High-field effects in polysilicon thin-film transistors **CDS** p45
Hot carrier effects in devices and circuits formed from poly-Si **CDS** p38
Hot-hole-induced degradation in polycrystalline silicon thin-film transistors: experimental and theoretical analysis **CDS** p33
In-situ phosphorous-doped VLPCVD polysilicon layers for polysilicon thin-film transistors **CDS** p19
Large-area shower implanter for thin-film transistors **CDS** p23
Losses in PWM inverters using IGBTs **EPA** p235
Low-temperature (≤600°C) polysilicon thin-film transistors **CDS** p9
MOS analogue circuit simulation with SPICE **CDS** p265
Performance improvement of MOSFET lasers by using trapezoidal gate MOSFETs **CDS** p69
Photocurrents in poly-Si TFTs **CDS** p27

INSULATORS AND INSULATION

Application of ultrasound to the NDT of solid insulation **SMT** p20
Computational study of very fast transients in GIS with special reference is effects of trapped charge and risetime on overvoltage amplitude **GTD** p485
Review of chemical indicators of degradation of cellulosic electrical paper insulation in oil-filled transformers **SMT** p324

INTEGRATED CIRCUITS

Base current reversal in bipolar transistors and circuits: a review and update **CDS** p299
Chip level fault location using X-algorithm **CDT** p259
Design and evaluation of a current-mode multiple-valued PLA based on a resonant tunnelling transistor model **CDS** p445
Design and operation of poly-Si analogue circuits **CDS** p60
Distributed system for VLSI layout compaction **CDT** p49
Explicit formula for harmonic distortion in SC filters with weakly nonlinear capacitors **CDS** p505
Fast VLSI architectures using nonredundant multibit recoding for computing A^Y mod N **CDS** p345
Hot carrier effects in devices and circuits formed from poly-Si **CDS** p38
Improvement on the diagonal routing model **CDS** p535
Low-DC power 2-18 GHz monolithic matrix amplifier **MAP** p440
Modelling of propagation delays in the bilevel crossing interconnections on the GaAs-based integrated circuits **CDS** p185
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
Parametric yield optimisation of MOS VLSI circuits based on simulated annealing and its parallel implementation **CDS** p387
Pole-parameter analysis: a novel approach for the design of filters **CDS** p121
Quasi-static analysis of skewed transmission lines for MMIC applications **MAP** p246
Robot path planning using VLSI resistive grids **VIS** p267
Successive asymptotic waveform evaluation of lossy distributed networks with nonlinear terminations **MAP** p473
Two-level partitioning algorithm with stable performance **CDS** p197
Ultrafast pipelined arithmetic using quantum electronic devices **CDT** p104

INTEGRATED OPTICS

Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda = 1.55\ \mu m$ **OPT** p323
Design procedures for passive planar coupled waveguide devices **OPT** p231
Effect of side wall roughness in buried channel waveguides **OPT** p242
Full-vectorial mode calculations by finite difference method **OPT** p281
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Low-loss fibre-matched diluted multiple quantum well waveguides **OPT** p296
Optical reflection filters based on intracavity quantum well polarisation convertors **OPT** p75
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Predicted performance of Franz-Keldysh effect optical reflection modulators and comparisons with similar multiple quantum well-based devices **OPT** p257
Silicon-on-insulator optical rib waveguides: loss, mode characteristics, bends and y-junctions **OPT** p391
Travelling wave electrode optimisation for high speed electro-optic modulators using the Fourier series method **OPT** p381

INTEGRATED OPTOELECTRONICS

Multistage optoelectronic switch networks **OPT** p173
Optoelectronic differential multiplexer logic based on phototransistors/LEDs and its use in optical systems **OPT** p401

INTERFERENCE SUPPRESSION

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Advances in design for EMC **SMT** p293
Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Autofocusing technique for adaptive coherent signal-subspace transformation beamformers **RSN** p30
Automatic detection and elimination of periodic pulse shaped interferences in partial discharge measurements **SMT** p335
Coherent processing of ultra-wideband radar signals **RSN** p171
Development of the generic standards **SMT** p249
Diffraction effects of a tape covering the gaps of a panelled 'compact range' operating at millimetre waves **MAP** p114
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Electromagnetic compatibility in Europe **SMT** p238
Electromagnetic compatibility in the automotive environment **SMT** p252
Electromagnetic compatibility of building cables **SMT** p263
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297

Electromagnetic modelling for EMC using finite methods **SMT** p303
Environmental coupling loss effects in superconducting HF loop antenna design **MAP** p94
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
FDTD evaluation of scattering by metallic objects in GTEM cells **SMT** p287
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Improved methods for prediction of electromagnetic noise radiated by electrical machines **EPA** p109
Medium PRF set selection: an approach through combinatorics **RSN** p307
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Prediction and measurement of EMC radiated immunity problems in interconnected digital electronic systems **SMT** p464
Present state of electromagnetic compatibility education and prospects for the future **SMT** p259
Recent developments in measurement techniques for use in screened rooms **SMT** p273
Response of externally excited coaxial cables with wire braided shields **SMT** p266
Split spread-spectrum technique for flexible use of frequency bands **RSN** p65
UK implementation of the EMC Directive **SMT** p234

ISDN

Analysis of out-of-sequence problem and preventative schemes in parallel switch architecture for high-speed ATM network **COM** p29
B-tree: a high-performance fault-tolerant ATM switch **COM** p20
Design and performance analysis of input-output buffering delta-based ATM switch with backpressure mechanism **COM** p255
Performance analysis of ATM switches using priority schemes **COM** p248
Performance analysis of the knockout switch with input buffers **COM** p183
Performance of scheduling algorithms for channel reservation **CDT** p341
Transmission of compressed voice over integrated services frame relay networks: priority service and adaptive buildout delay **COM** p265

LASER MODES

Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda=1.55\ \mu m$ **OPT** p323
Control of nearly degenerate four-wave mixing in a distributed feedback semiconductor laser amplifier via coherent electrical modulation **OPT** p33
Diffraction grating model for transmission-line laser model of actively modelocked semiconductor lasers **OPT** p21
Laser beam modulator of partially loaded microstrip line structure **OPT** p145
Optimum prechirping conditions of externally modulated lasers for transmission on standard fibre **OPT** p363
Simple method for estimating the memory diagram in single mode semiconductor lasers **OPT** p109
Static and dynamic characteristics of MQW DFB lasers with varying ridge width **OPT** p303
Temporal and spectral gain dynamics in an actively modelocked semiconductor laser **OPT** p127
Transmission-line delay limitations of laser bandwidths **OPT** p163

LASER THEORY

Comparison between 'power matrix model' and 'time domain model' in modelling large signal responses of DFB lasers **OPT** p89
Comparison of different DFB laser models within the European COST 240 collaboration **OPT** p82
Comparison of self-pulsation in multisection lasers with distributed feedback and intracavity saturable absorbers **OPT** p114
Complex finite difference method applied to the analysis of semiconductor lasers **OPT** p97
Field statistics modelling of beat noise in an optical amplifier **OPT** p185

LASERS

Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda=1.55\ \mu m$ **OPT** p323
Comparison between 'power matrix model' and 'time domain model' in modelling large signal responses of DFB lasers **OPT** p89
Comparison of different DFB laser models within the European COST 240 collaboration **OPT** p82
Comparison of self-pulsation in multisection lasers with distributed feedback and intracavity saturable absorbers **OPT** p114
Density matrix model for highly nondegenerate four-wave mixing in semiconductor laser devices **OPT** p119
Discussion of the linewidth enhancement factor α of GaAs/GaAlAs quantum well lasers **OPT** p311
Intensity noise and linewidth characteristics of laser diodes with phase conjugate optical feedback **OPT** p103
Laser beam modulator of partially loaded microstrip line structure **OPT** p145
Optimisation of 670 nm strained-quantum-well laser diodes for high-temperature operation **OPT** p136
Optimum design of Er^{3+} doped fluoride fibre amplifiers pumped at 820 nm and 1480 nm **OPT** p167
Optoelectronic and structural properties of polysilicon produced by excimer laser and furnace crystallisation of hydrogenated amorphous silicon (a-Si:H) **CDS** p15
Performance improvement of MOSFET lasers by using trapezoidal gate MOSFETs **CDS** p69
Performance of 1.3 μm ridge waveguide distributed feedback lasers fabricated by one-step metalorganic chemical vapour deposition **OPT** p316
Proton-exchange channel waveguide lasers in Nd:MgO:$LiNbO_3$ **OPT** p195
Reliability assessment of multiwell distributed feedback laser source for direct detection links at 2.6 Gbit/s **OPT** p133
Transmission-line delay limitations of laser bandwidths **OPT** p163

LEGISLATION

Approximate analysis of a dynamic-channel-assignment scheme with handoffs **COM** p89
Development of the generic standards **SMT** p249
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Split spread-spectrum technique for flexible use of frequency bands **RSN** p65

LINEAR NETWORK ANALYSIS

Active RC filter based on simulation of dissipative LC filters **CDS** p101
Analysis of a composite amplifier technique for optimum noise performance **CDS** p210
Characteristic impedance of rectangular coaxial cone transmission line **MAP** p326
Coplanar waveguide two-stage balanced MMIC amplifier using impedance-transforming lumped-distributed branchline couplers **MAP** p241
Electromagnetic modelling for EMC using finite methods **SMT** p303
Equivalent circuit model for microstrip multiport radial dividers **MAP** p333
Leap-frog circuit compensating influence of GB product and second pole of operational amplifier **CDS** p203
Matrix methods for the design of transconductor ladder filters **CDS** p89
Modelling of the glass microelectrode tip **SMT** p391
Modified determinations of stability criteria for accurate designing the linear two-port amplifiers **MAP** p238
New frequency-domain TLM method for the numerical solution of steady-state electromagnetic problems **SMT** p310
Quasi-static analysis of skewed transmission lines for MMIC applications **MAP** p246
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458
Technique for modelling resonant strip placed in the transverse plane of a rectangular waveguide **MAP** p329
Variational solution of lumped element and distributed electrical circuits **SMT** p423

LOGIC AND SWITCHING CIRCUITS

Analogue- and binary-to-residue conversion schemes **CDS** p135
Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Chip level fault location using X-algorithm **CDT** p259
Concurrent-error detection in high-speed carry-free dividers **CDT** p356
Constant integer multiplication using minimum adders **CDS** p407
Decomposition of logic networks with emphasis on signed digit arithmetic systems **CDS** p307
Design and evaluation of a current-mode multiple-valued PLA based on a resonant tunnelling transistor model **CDS** p445
Design for testability of sequential circuits **CDT** p153
Design of residue generators and multioperand adders modulo 3 built of multioutput threshold circuits **CDT** p129
Division unit with Newton-Raphson approximation and digit-by-digit refinement of the quotient **CDT** p317
Efficient modelling and synthesis procedure of asynchronous sequential logic elements **CDT** p61
Efficient parallel pipelinable VLSI architecture for finding the maximum binary number **CDS** p527
FSMTEST: synthesis for testability and test generation of PLA-based FSM **CDT** p221
Genetic beam search for gate matrix layout **CDT** p123
Interleaving security and efficiency considerations in the design of inexpensive IC cards **CDT** p265
KGPMAP:library-based technology-mapping technique for antifuse based FPGAs **CDT** p361
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369
New analytical procedure for automatic cell placement in gate-arrays **CDS** p476
New global routing subsystem for CMOS gate arrays **CDS** p421
Optimised synthesis of delay-insensitive circuits using time-sharing **CDT** p111
Petri-net-based algorithms for parallel-controller synthesis **CDT** p405
Pipeline ring data-flow architecture for solving large iterative structures **CDT** p212
Radix digit-serial pipelined divider/square-root architecture **CDT** p375
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229
Testing differential split-level CMOS circuits **CDS** p451
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Transient analysis and hazard-free design of exclusive-OR switching networks **CDT** p274
Two-level partitioning algorithm with stable performance **CDS** p197
Ultrafast pipelined arithmetic using quantum electronic devices **CDT** p104
VLSI structures for bit-serial modular multiplication using basis conversion **CDT** p381

LOGIC DESIGN

Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Chip level fault location using X-algorithm **CDT** p259
Concurrent-error detection in high-speed carry-free dividers **CDT** p356
Decomposition of logic networks with emphasis on signed digit arithmetic systems **CDS** p307
Design and evaluation of a current-mode multiple-valued PLA based on a resonant tunnelling transistor model **CDS** p445
Efficient modelling and synthesis procedure of asynchronous sequential logic elements **CDT** p61
FSMTEST: synthesis for testability and test generation of PLA-based FSM **CDT** p221
Genetic beam search for gate matrix layout **CDT** p123
Heterogeneous Petri net methodology for the design of complex controllers **CDT** p293
Interleaving security and efficiency considerations in the design of inexpensive IC cards **CDT** p265
KGPMAP:library-based technology-mapping technique for antifuse based FPGAs **CDT** p361
Minimisation of control store width in digital systems **CDT** p243
New analytical procedure for automatic cell placement in gate-arrays **CDS** p476

Petri-net-based algorithms for parallel-controller synthesis **CDT** p405
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229
Stride: a tool for formal interactive system synthesis **CDT** p347
Testing differential split-level CMOS circuits **CDS** p451
Transient analysis and hazard-free design of exclusive-OR switching networks **CDT** p274
Two-level partitioning algorithm with stable performance **CDS** p197

MAGNETIC MATERIALS AND DEVICES

Back-EMF waveforms and core losses in brushless DC motors **EPA** p144
Calculation of winding losses in high-frequency toroidal inductors using single strand conductors **EPA** p52
Magnetic and loss characteristics of nonoriented silicon-iron under unconventional conditions **SMT** p75
Travelling wave excitation of nonlinear magnetic materials of significant conductivity **SMT** p499

MASS SPECTROMETRY

Laser-induced plasmas and resonance ionisation spectroscopies **SMT** p83
Use of an ion energy analyser-mass spectrometer to measure ion kinetic-energy distributions from RF discharges in argon-helium gas mixtures **SMT** p105

MATERIALS AND MATERIALS TESTING

Application of ultrasound to the NDT of solid insulation **SMT** p20
Characterising the performance of a confocal acoustic microscope **SMT** p48
Eddy current detection of crack orientation using elliptical excitation **SMT** p41
Pulse-echo scattering in solids with nonuniform transducers **SMT** p363

MATHEMATICAL TECHNIQUES

Adaptive allpass filtering for nonminimum-phase system identification **VIS** p373
Adaptive control of discrete systems using neural networks **CTA** p209
Adaptive predistortion lineariser using polynomial functions **COM** p49
Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Analysis and simulation of multiple-ring token networks **CDT** p135
Application of clustering and factorisation tree techniques for parallel solution of sparse network equations **GTD** p609
Applying the controlled aliasing technique for fast prediction of the output response of nonlinear circuits driven by composite signals **CDS** p65
Attributed relational tree approach to signal classification **RSN** p319
Bayesian model selection applied to spatial signal processing **VIS** p76
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Colour texture analysis using colour histogram **VIS** p403
Comparison of known signal detection schemes under a weakly dependent noise model **VIS** p303
Comparison of parameter estimators for K-distribution **RSN** p45
Comparison of some noise-compensation methods for speech recognition in adverse environments **VIS** p280
Complementarity between the energy results of H and E formulations in eddy-current problems **SMT** p25
Complex finite difference method applied to the analysis of semiconductor lasers **OPT** p97
Complex gradient and Hessian **VIS** p380
Computer-aided design of an RF MOSFET power amplifier **CDS** p433
Constant integer multiplication using minimum adders **CDS** p407
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
Detailed computation of the effects on the performance of open resonators caused by imperfections in the resonator geometry **MAP** p451
Differential transmission of evolution measures in SCADA systems **GTD** p253
Direct approach to design of PCAS filters with combined gain and phase specification **VIS** p161
DOA estimation method for unknown noise fields **RSN** p149
Eddy current detection of crack orientation using elliptical excitation **SMT** p41
Edge-wave diffraction for flat-plate structures **MAP** p30
Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521
Efficient evaluation of singular and infinite integrals using the tanh transformation **MAP** p464
Efficient method for alleviating voltage limit violations using local optimisation **GTD** p279
Electromagnetic scattering by an impedance cylinder coated eccentrically with a chiroplasma cylinder **MAP** p279
Enhanced Newton-Raphson algorithm for normal, controlled and optimal power-flow solutions using column exchange techniques **GTD** p647
Experimental evaluation of junction circulators: a review **MAP** p351
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Fast time-series adaptive-filtering algorithm based on the QRD inverse-updates method **VIS** p325
Fingerprint enhancement by directional Fourier filtering **VIS** p87
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
Fourier coded-aperture imaging in nuclear medicine **SMT** p179
Fourth-order cumulant matrices for DOA estimation **RSN** p144
Full-vectorial mode calculations by finite difference method **OPT** p281
Fuzzy linear programming: an application to hydroelectric generation scheduling **GTD** p568
Generalised block-matching motion estimation using quad-tree structured spatial decomposition **VIS** p446
Genetic algorithm solution to the economic dispatch problem **GTD** p377
Genetic and genetic/simulated-annealing approaches to economic dispatch **GTD** p507
Genetic beam search for gate matrix layout **CDT** p123
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
GMV technique for nonlinear control with neural networks **CTA** p57
Hybrid approach to speech recognition using hidden Markov models and Markov chains **VIS** p273
Identification of the SA-330 Puma helicopter **CTA** p130
Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Inclusion of weather effects in composite system reliability evaluation using sequential simulation **GTD** p575
Integer-linear-programming eigenvector-based approach for multipartitioning power system state-estimation networks **GTD** p11
Integral equations for EM scattering by homogeneous/inhomogeneous two-dimensional chiral bodies **MAP** p385
Interactive fuzzy satisfying method for optimal multi-objective VAr planning in power systems **GTD** p554
Kernels of anticausal operators and the multivariable generalised predictive control problem **CTA** p181
Medium PRF set selection: an approach through combinatorics **RSN** p307
Microstrip with dielectric overlay: variational analysis and validation **MAP** p138
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369
Mixed H_2/H_∞ optimisation with model-matching **CTA** p329
MLSE differential phase detection for M-ary DPSK **COM** p407
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Multifrequency binary testing in measurement and control **SMT** p1
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
Multiobjective VAr planning using the goal-attainment method **GTD** p227
Multiplier-less FIR filter design using a genetic algorithm **VIS** p175
Neural network modelling of unknown nonlinear systems subject to immeasurable disturbances **CTA** p216
New analytical procedure for automatic cell placement in gate-arrays **CDS** p476
New method for the simulation of correlated K-distributed clutter **RSN** p53
New shortened subcodes of binary extended QR codes **COM** p2
New technique of network partitioning for voltage collapse margin calculations **GTD** p630
Non-analytic object recognition using the Hough transform with the matching technique **CDT** p11
Novel differential formulation of electromagnetic scattering by dielectric cylinders of arbitrary cross-section **MAP** p189
Novel finite-element analysis of space-charge modified fields **SMT** p369
Optimisation efficiency in behavioural synthesis **CDS** p399
Optimised synthesis of delay-insensitive circuits using time-sharing **CDT** p111
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Parameter identification of inverter drive system **EPA** p303
Parametric yield optimisation of MOS VLSI circuits based on simulated annealing and its parallel implementation **CDS** p387
Paraxial corona discharge. II. Simulation and analysis **SMT** p205
Partitioned mixture distribution: an adaptive Bayesian network for low-energy image processing **VIS** p251
Performance analysis of a multicast packet switch with capacity m **COM** p177
Performance analysis of an ATM statistical multiplexer with batch arrivals **COM** p190
Performance analysis of ATM switches using priority schemes **COM** p248
Performance of scheduling algorithms for channel reservation **CDT** p341
Petri-net-based algorithms for parallel-controller synthesis **CDT** p405
PID controller design for a TITO system **CTA** p111
Plane-wave diffraction by a two-part impedance strip **SMT** p383
Preventing tree saturation in multistage networks **CDT** p35
Pulse-echo scattering in solids with nonuniform transducers **SMT** p363
Quick recovery of two embedded complete binary trees in a hypercube **CDT** p205
Radar detection in K-distributed clutter **RSN** p116
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458
Reversal of bounds in some dual-bound resistance calculations **SMT** p429
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Sampling-time effects of higher-order digitisations and their applications in digital redesign **CTA** p83
Scattering from a dielectric circular cylinder partially clad by a perfect electric conductor **MAP** p536
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Short-term hydrothermal scheduling. II. Parallel simulated annealing approach **GTD** p502
Short-term hydrothermal scheduling part. I. Simulated annealing approach **GTD** p497
Simple method for calculating Fourier coefficients of experimentally obtained waveforms **SMT** p177
Simplified Green's functions for calculating capacitance and inductance of multiconductor transmission lines in multilayered media **MAP** p141
Simulated annealing in the analysis of resonant DC link inverters **EPA** p163
Single Mueller matrix description of the propagation of degree of polarisation in a uniformly anisotropic single-mode optical fibre **OPT** p367
Speaker-independent isolated word recognition using multiple hidden Markov models **VIS** p197
Statistical analysis of state-space approach in harmonic retrieval **VIS** p181
Stochastic analysis in the time domain of very high speed digital distance relays. I. Theory **GTD** p161
Structural modelling and optimisation of large scale systems **CTA** p1
Successive asymptotic waveform evaluation of lossy distributed networks with nonlinear terminations **MAP** p473
Symbolic analysis of large-scale microwave networks **MAP** p433
Textured image segmentation by context enhanced clustering **VIS** p413
Thermal unit commitment using genetic algorithms **GTD** p459
Two-dimensional temperature modelling of DH laser diodes using the transmission-line modelling (TLM) method **SMT** p7
Two original weight pruning methods based on statistical tests and rounding techniques **VIS** p230
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391
Variational solution of lumped element and distributed electrical circuits **SMT** p423

MEASUREMENT OF SPECIFIC VARIABLES

A new numeric technique for high-speed evaluation of power system frequency **GTD** p529
Adaptive load shedding for isolated power systems **GTD** p491
Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283

Aircraft geometric height computation using secondary surveillance radar range differences **RSN** p119
Automatic detection and elimination of periodic pulse shaped interferences in partial discharge measurements **SMT** p335
Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
Characterisation of microwave four-parameter materials and its application in wideband radar absorber design **RSN** p337
Characterising the discharge development due to surface contamination in GIS using the UHF technique **SMT** p118
Conductivity and permittivity images from an induced current electrical impedance tomography system **SMT** p356
Critical distance and the performance of sensor array geometries **RSN** p333
Current measurement using compensated coaxial shunts **SMT** p471
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Effect of side wall roughness in buried channel waveguides **OPT** p242
Experimental evaluation of capacitance tomographic flow imaging systems using physical models **CDS** p357
Experimental evaluation of junction circulators: a review **MAP** p351
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
Extended effective output noise temperatures of multiresponse systems **MAP** p393
High frequency and high resolution capacitance measuring circuit for process tomography **CDS** p215
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
Low-power optical current measurement system employing a hybrid transmitter **SMT** p129
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Modified Pockels sensor for electric-field measurements **SMT** p481
Neural network for pattern association in electrical capacitance tomography **CDS** p517
New approach to distance protection for resistive double-phase to earth faults using adaptive techniques **GTD** p369
New VHF impedance measuring instrument for UK national standard **SMT** p71
Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
Paraxial corona discharge. I. Review, instrumentation and experiments **SMT** p197
Practical Sagnac interferometer based fibre optic current sensor **OPT** p249
Recent developments in measurement techniques for use in screened rooms **SMT** p273
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123
Spun linear birefringence fibres and their sensing mechanism in current sensors with temperature compensation **OPT** p373
Study on Kerr electro-optic field measurement method for nonuniform three-dimensional electric field **SMT** p418
Thermometry of lossy microstriplines by correlation radiometry **MAP** p307
Vision-based gauge for online weld profile metrology **SMT** p521

MEASUREMENT SCIENCE

Advances in measurement methods and reduction of measurement uncertainties associated with antenna calibration **SMT** p283
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
New VHF impedance measuring instrument for UK national standard **SMT** p71
Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
One-step connection method for the measurement of N-port microwave networks using six-port techniques **MAP** p285
Self-calibratable voltage transformer with part-per-million accuracy **SMT** p379

MICROWAVE CIRCUITS

Analytical model for the AlGaAs/GaAs multiemitter finger HBT including self-heating and thermal coupling effects **CDS** p469
Coplanar waveguide two-stage balanced MMIC amplifier using impedance-transforming lumped-distributed branchline couplers **MAP** p241
Low-DC power 2-18 GHz monolithic matrix amplifier **MAP** p440
Modelling of arbitrarily shaped MMIC and hybrid planar circuits with a mixed waveguide model boundary integral method **MAP** p495
Modified determinations of stability criteria for accurate designing the linear two-port amplifiers **MAP** p238
Performance characterisation of a microwave transistor **CDS** p337
Quasi-static analysis of skewed transmission lines for MMIC applications **MAP** p246
Recursive algorithm for noise analysis of a two-port network with arbitrary internal topology using the S-wave approach **MAP** p458
Simulation-based parameter extraction, its implementation and some applications **CDS** p129
Symbolic analysis of large-scale microwave networks **MAP** p433

MICROWAVE MEASUREMENT TECHNIQUES

Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
Characterisation of microwave four-parameter materials and its application in wideband radar absorber design **RSN** p337
Correction of satellite beacon propagation data using radiometer measurements **MAP** p62
Experimental evaluation of junction circulators: a review **MAP** p351
FDTD evaluation of scattering by metallic objects in GTEM cells **SMT** p287
Main-beam reduction for compact range imaging **MAP** p461
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
New VHF impedance measuring instrument for UK national standard **SMT** p71
One-step connection method for the measurement of N-port microwave networks using six-port techniques **MAP** p285
Thermometry of lossy microstriplines by correlation radiometry **MAP** p307
Use of radiometers in atmospheric attenuation measurements **MAP** p428

MILITARY SYSTEMS

Impact of technology on the defeat of the U-boat September 1939-May 1943 **SMT** p343

MODULATION

Adaptive predistortion lineariser using polynomial functions **COM** p49
Adaptive two-stage maximum likelihood estimation for cellular radio **COM** p39
Analytic and numeric modelling of optical fibre PPM slot and frame spectral properties with application to timing extraction **COM** p379
Asymptotic bounds on the size of error-correcting recording codes **COM** p365
Bandwidth tradeoffs among coding, processing gain and modulation in frequency-hopped multiple access communications **COM** p63
Channel error profiles for DECT **COM** p413
Comparison between linear FM and phase-coded CW radars **RSN** p230
Direct differential detection of phase-shift-keyed signals: a local-oscillatorless DPSK receiver **OPT** p38
Frequency hopped spread spectrum multiple access over cellular dispersive fading channels **COM** p79
Further results on receivers for the nonlinear channel including pre- and post-nonlinearity filtering **COM** p334
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
MLSE differential phase detection for M-ary DPSK **COM** p407
Novel approach to the design of I/Q demodulation filters **VIS** p154
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Optimum prechirping conditions of externally modulated lasers for transmission on standard fibre **OPT** p363
Performance analysis of a slow FH/MFSK acquisition scheme in random partial band noise jamming **COM** p396
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253
Simplified error bound analysis for M-DPSK in fading channels with diversity reception **COM** p341
Structure of round-off noise in single-bit second-order sigma-delta modulators with zero input **VIS** p107
Transmission-line delay limitations of laser bandwidths **OPT** p163

MODULATORS AND DEMODULATORS

Adaptive predistortion lineariser using polynomial functions **COM** p49
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Fast peak detector for variable frequency three-phase sinusoidal signals **CDS** p151
New high accuracy pulse width modulation based digital-to-analogue convertor/power amplifier **CDS** p315
Optimisation of signal phase split in vector modulator phase shifters **CDS** p207
Structure of round-off noise in single-bit second-order sigma-delta modulators with zero input **VIS** p107

MULTIMEDIA

Performance analysis and sequence designs of synchronous code-division multiple-access systems with multimedia services **COM** p371

MULTIPROCESSOR SYSTEMS

Analysis and simulation of multiple-ring token networks **CDT** p135
Application of clustering and factorisation tree techniques for parallel solution of sparse network equations **GTD** p609
Asymmetrical three-phase load-flow study based on symmetrical component theory **GTD** p248
Effect of nonuniform traffic on the performance of multistage interconnection networks **CDT** p169
Fast harmonic power flow calculation using parallel processing **GTD** p27
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Guiding instruction scheduling with synchronisation markers on a superscalar based multiprocessor **CDT** p398
Load balancing algorithms for an extended hypercube **CDT** p298
Parallel processing of sparse power system equations **GTD** p68
Pipeline ring data-flow architecture for solving large iterative structures **CDT** p212
Preventing tree saturation in multistage networks **CDT** p35
Processor allocation strategies for modified hypercubes **CDT** p196
Short-term hydrothermal scheduling. II. Parallel simulated annealing approach **GTD** p502
Speedup and synchronisation overhead analysis of Gauss-Seidel type algorithms on a Sequent balance machine **GTD** p437

MULTIVARIABLE CONTROL SYSTEMS

Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Decoupling design of multivariable generalised predictive control **CTA** p197
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Kernels of anticausal operators and the multivariable generalised predictive control problem **CTA** p181
Multivariable adaptive control of AC-DC systems **GTD** p658
Necessary conditions for limit cycles in multiloop relay systems **CTA** p163
New sequential design procedures for multivariable systems based on Gauss-Jordan factorisation **CTA** p427

Optimally decoupled robust control of MIMO plants with multiple delays **CTA** p25
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
PID controller design for a TITO system **CTA** p111
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70
Total control of fast coordinate measuring machines **CTA** p373

NETWORK ANALYSIS

Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Clock feedthrough analysis and cancellation in current sample/hold circuits **CDS** p510
Explicit formula for harmonic distortion in SC filters with weakly nonlinear capacitors **CDS** p505

NEURAL NETS

Adaptive control of discrete systems using neural networks **CTA** p209
Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Analysis of electromechanical modes using an artificial neural network **GTD** p198
Application of the CMAC input encoding scheme in the N-tuple approximation network **CDT** p177
Artificial neural network and spectrum analysis methods for detecting brain diseases from the CNV response in the electroencephalogram **SMT** p432
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Consideration of multiplexing in neural network hardware **CDS** p237
Contextual image labelling with a neural network **VIS** p238
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
Detection of circular arcs for content-based retrieval from an image database **VIS** p49
Distributed arithmetic perceptron **CDS** p382
Feasibility of using unsupervised learning, artificial neural networks for the condition monitoring of electrical machines **EPA** p317
Forecasting daily load curves using a hybrid fuzzy-neural approach **GTD** p561
GMV technique for nonlinear control with neural networks **CTA** p57
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
Modelling of medical magnetic-resonance-imaging signals **VIS** p71
Multifrequency binary testing in measurement and control **SMT** p1
Neural-net controller for nonlinear plants: design approach through linearisation **CTA** p315
Neural-network based adaptive single-pole autoreclosure technique for EHV transmission systems **GTD** p155
Neural network-based F0 text-to-speech synthesiser for Mandarin **VIS** p384
Neural network based parameter estimation of unstable aerospace dynamic systems **CTA** p385
Neural network for pattern association in electrical capacitance tomography **CDS** p517
Neural network modelling of unknown nonlinear systems subject to immeasurable disturbances **CTA** p216
Novelty detection and neural network validation **VIS** p217
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Original approach for the localisation of objects in images **VIS** p245
Partitioned mixture distribution: an adaptive Bayesian network for low-energy image processing **VIS** p251
Robot path planning using VLSI resistive grids **VIS** p267
Scheduling of hydroelectric generations using artificial neural networks **GTD** p452
Self tuning of computed torque gains by using neural networks with flexible structures **CTA** p235
Some investigations on neural processing of scattered light in water quality assessment **VIS** p261
Supervised and unsupervised learning in radial basis function classifiers **VIS** p210
Supervised learning control of a nonlinear polymerisation reactor using the CMAC neural network for knowledge storage **CTA** p33
Two original weight pruning methods based on statistical tests and rounding techniques **VIS** p230

NONELECTRIC VARIABLES CONTROL

Adaptive optimum start-up and shut-down time controllers for heating systems based on a robust gradient method **CTA** p323
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Advanced aircraft flight control using nonlinear inverse dynamics **CTA** p418
Analysis and control of torque ripples in inverter-fed permanent-magnet synchronous motors using the electromechanical spring-stiffness coefficient $\partial T_e/\partial\theta$ **EPA** p169
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Robust nonlinear control of heating plant **CTA** p227
Self tuning of computed torque gains by using neural networks with flexible structures **CTA** p235
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70
Total control of fast coordinate measuring machines **CTA** p373
Vision-based gauge for online weld profile metrology **SMT** p521

NONLINEAR CONTROL SYSTEMS

Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Exponentially stable robust control law for robot manipulators **CTA** p389
Extension of the covariance control principle to nonlinear stochastic systems **CTA** p93
Global robust adaptive control of power systems **GTD** p429
GMV technique for nonlinear control with neural networks **CTA** p57
Near time-optimal control of nonlinear servomechanisms **CTA** p145
Robust nonlinear control of heating plant **CTA** p227
Supervised learning control of a nonlinear polymerisation reactor using the CMAC neural network for knowledge storage **CTA** p33

NONLINEAR NETWORK ANALYSIS

Analysis of nonlinearities in MOS floating resistor networks **CDS** p82
Applying the controlled aliasing technique for fast prediction of the output response of nonlinear circuits driven by composite signals **CDS** p65
Computer-aided design of an RF MOSFET power amplifier **CDS** p433
Differential-current derived feedback in error-correcting audio amplifier applications **CDS** p227
Efficient partitioning-based method to determine the upper bound on the number of operating points in transistor circuits **CDS** p258
Extended harmonic balance method **CDS** p275
Implementing high-order continuity and rate dependence in SPICE models **CDS** p251
Large signal periodic time-domain circuit simulation **CDS** p285
New formulations to describe translinear mixed cells accurately **CDS** p167
Overview of SPICE-like circuit simulation algorithms **CDS** p242
Successive asymptotic waveform evaluation of lossy distributed networks with nonlinear terminations **MAP** p473
Uniqueness of solutions of networks with two terminal piecewise linear resistors **CDS** p369
Variational solution of lumped element and distributed electrical circuits **SMT** p423

NONLINEAR OPTICS

Comparison between 'power matrix model' and 'time domain model' in modelling large signal responses of DFB lasers **OPT** p89
Comparison of self-pulsation in multisection lasers with distributed feedback and intracavity saturable absorbers **OPT** p114
Control of nearly degenerate four-wave mixing in a distributed feedback semiconductor laser amplifier via coherent electrical modulation **OPT** p33
Density matrix model for highly nondegenerate four-wave mixing in semiconductor laser devices **OPT** p119
Impact of input signals on the bit error rate performance of semiconductor-laser-amplifier-based switch systems **OPT** p265
Intensity noise and linewidth characteristics of laser diodes with phase conjugate optical feedback **OPT** p103
Nonlinearities in high-index-coupled $\lambda/4$-shifted distributed-feedback semiconductor lasers **OPT** p8

NUMERICAL ANALYSIS

Accurate absorbing boundary conditions for the FDTD analysis of H-plane waveguide discontinuities **MAP** p59
Analysis of a dielectric resonator antenna in a cylindrical conducting cavity: HEM modes **MAP** p8
Analysis of electromechanical modes using an artificial neural network **GTD** p198
Analysis of offset dual-patch microstrip antenna **MAP** p523
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
Capacitance of circularly symmetric via for microstrip transmission line **MAP** p265
Characterisation of electromagnetically coupled superquadric loop antennas for mobile communications applications **MAP** p85
Classified vector quantisation with variable block-size DCT models **VIS** p39
Comparison between two formulations in terms of potential for the coupling of magnetic and electric circuit equations **SMT** p486
Complementarity between the energy results of H and E formulations in eddy-current problems **SMT** p25
Complex finite difference method applied to the analysis of semiconductor lasers **OPT** p97
Degradation in on-state characteristics of IGBTs through self-heating **CDS** p439
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Eddy current detection of crack orientation using elliptical excitation **SMT** p41
Edge-wave diffraction for flat-plate structures **MAP** p30
Effect of end core flux on the performance of the switched reluctance motor **EPA** p308
Effect of radial rotor ventilation ducts on cage motor equivalent circuit parameters **EPA** p155
Effect of rotor dimensions and cross magnetisation on L_d and L_q inductances of reluctance synchronous machine with cageless flux barrier rotor **EPA** p213
Electromagnetic computer modelling for EMC (integral methods) **SMT** p297
Electromagnetic fields interpolation from nonuniform samples over spherical and cylindrical surfaces **MAP** p77
Electromagnetic imaging of infinite dielectric cylinders using a modified Born approximation and including a priori information on the unknown cross sections **MAP** p445
Electromagnetic modelling for EMC using finite methods **SMT** p303
Elliptical waveguide analysis using improved polynomial approximation **MAP** p483
Enhanced Newton-Raphson algorithm for normal, controlled and optimal power-flow solutions using column exchange techniques **GTD** p647
Estimation of texture parameters in K-distributed clutter **RSN** p196
Extended harmonic balance method **CDS** p275
FDTD evaluation of scattering by metallic objects in GTEM cells **SMT** p287
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
Finite element analysis of propagating, evanescent, and complex modes in finlines **MAP** p65

Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
FIR filter order reduction: balanced model truncation and Hankel-norm optimal approximation **VIS** p168
Fractal model of a one-dimensional discrete signal and its implementation **VIS** p318
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
Full characterisation of varactor-loaded, probe-fed, rectangular, microstrip patch antennas **MAP** p367
Full-vectorial mode calculations by finite difference method **OPT** p281
Fullwave analysis of multilayer microstrip lines **MAP** p185
General localised junction model in the analysis of wire-to-plate junctions **MAP** p1
Generalised convertor models for iterative harmonic analysis in power systems **GTD** p445
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Hermite sieve as a wavelet-like array for 1D and 2D signal decomposition **VIS** p348
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
Integer-linear-programming eigenvector-based approach for multipartitioning power system state-estimation networks **GTD** p11
Integral equations for EM scattering by homogeneous/inhomogeneous two-dimensional chiral bodies **MAP** p385
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
Magnetic field analysis of asymmetrical machines by finite element method **GTD** p53
Manifold interpolation for diversely polarised arrays **RSN** p19
Mathematical model of gate-turn-off thyristor for use in circuit simulations **EPA** p284
Method of lines for analysis of planar conductors with finite thickness **MAP** p223
Modelling of arbitrarily shaped MMIC and hybrid planar circuits with a mixed waveguide model boundary integral method **MAP** p495
Modelling of straight thin wires using time-domain electric field integral equations **MAP** p123
Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
Nonlinear echo cancelling using look-up tables and Volterra systems **VIS** p357
Novel differential formulation of electromagnetic scattering by dielectric cylinders of arbitrary cross-section **MAP** p189
Novel finite-element analysis of space-charge modified fields **SMT** p369
NTSC component separation via Hadamard transform **VIS** p27
Numerical simulations for frequency-selective screens with complementary elements **MAP** p477
Optimisation of radiation efficiency for a transverse ground-plane slot in boxed-stripline **MAP** p509
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Overview of SPICE-like circuit simulation algorithms **CDS** p242
Parameter identification of inverter drive system **EPA** p303
Paraxial corona discharge. II. Simulation and analysis **SMT** p205
Plane-wave diffraction by a two-part impedance strip **SMT** p383
Probabilistic iterative harmonic analysis of power systems **GTD** p329
Pulse-echo scattering in solids with nonuniform transducers **SMT** p363
Quasi-static analysis of skewed transmission lines for MMIC applications **MAP** p246
Radix-2 FFT-pipeline architecture with reduced noise-to-signal ratio **VIS** p81
Rigorous analysis of lunar waveguides with the boundary element method **MAP** p235
Scattering from a dielectric circular cylinder partially clad by a perfect electric conductor **MAP** p536
Scattering from a rectangular aperture in rectangular-to-circular and circular-to-circular waveguide junctions **MAP** p489
Simulating 3D waveguide discontinuities using a combination of Prony's method and FDTD with improved absorbing boundary conditions **MAP** p127
Single Mueller matrix description of the propagation of degree of polarisation in a uniformly anisotropic single-mode optical fibre **OPT** p367
Speedup and synchronisation overhead analysis of Gauss-Seidel type algorithms on a Sequent balance machine **GTD** p437
Survey of analytical and numerical models for probe-fed microstrip antennas **MAP** p15
Systolic implementation of FIR decimators and interpolators **CDS** p489
Taking into account the edge condition in the problem of scattering from the circular aperture in circular-to-rectangular and rectangular-to-rectangular waveguide junctions **MAP** p45
Theoretical and experimental investigations on orthogonal mode coupler **MAP** p261
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Tower modelling for lightning surge analysis using Electro-Magnetic Transients Program **GTD** p637
Two-dimensional temperature modelling of DH laser diodes using the transmission-line modelling (TLM) method **SMT** p7
Two-level partitioning algorithm with stable performance **CDS** p197
Variable-step-size LMS algorithm: new developments and experiments **VIS** p311
Voltage stability as affected by discrete changes in the topology of power networks **GTD** p346

OFFICE AUTOMATION

Electronic mail: case study in task-oriented restructuring of application domain **CDT** p65
Identity-based conference key broadcast systems **CDT** p57

OPTICAL BEAM MODULATORS

Laser beam modulator of partially loaded microstrip line structure **OPT** p145
Optical modulators using fibreoptic Sagnac interferometers **OPT** p1
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Predicted performance of Franz-Keldysh effect optical reflection modulators and comparisons with similar multiple quantum well-based devices **OPT** p257
Travelling wave electrode optimisation for high speed electro-optic modulators using the Fourier series method **OPT** p381

OPTICAL COMMUNICATION

Optical reflection filters based on intracavity quantum well polarisation convertors **OPT** p75
Optimum design of Er^{3+} doped fluoride fibre amplifiers pumped at 820 nm and 1480 nm **OPT** p167
Transmission-line delay limitations of laser bandwidths **OPT** p163

OPTICAL IMAGE PROCESSING

2D shape signature based on fractal measurements **VIS** p422
Attributed relational tree approach to signal classification **RSN** p319
Classified vector quantisation with variable block-size DCT models **VIS** p39
Colour texture analysis using colour histogram **VIS** p403
Comparison of parameter estimators for K-distribution **RSN** p45
Complete processing system that uses fuzzy logic for ship detection in SAR images **RSN** p181
Computer aided design for teaching modern optics to electronic engineering undergraduates **SMT** p171
Contextual image labelling with a neural network **VIS** p238
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
Detection of circular arcs for content-based retrieval from an image database **VIS** p49
Estimation of general 2D motion using Fourier descriptors **VIS** p115
Experimental evaluation of capacitance tomographic flow imaging systems using physical models **CDS** p357
Fast closest codeword search algorithms for vector quantisation **VIS** p143
Fingerprint enhancement by directional Fourier filtering **VIS** p87
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Generalised block-matching motion estimation using quad-tree structured spatial decomposition **VIS** p446
Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Low bitrate video coding with depth compensation **VIS** p149
Modelling of medical magnetic-resonance-imaging signals **VIS** p71
Neural network for pattern association in electrical capacitance tomography **CDS** p517
New method for the simulation of correlated K-distributed clutter **RSN** p53
NTSC component separation via Hadamard transform **VIS** p27
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Original approach for the localisation of objects in images **VIS** p245
Partitioned mixture distribution: an adaptive Bayesian network for low-energy image processing **VIS** p251
Superresolution technique with edge-based ringing reduction for passive millimetre-wave images **VIS** p9
Supervised and unsupervised learning in radial basis function classifiers **VIS** p210
Textured image segmentation by context enhanced clustering **VIS** p413
Top down structured parallelisation of embedded image processing applications **VIS** p431
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm **VIS** p339
Vision-based gauge for online weld profile metrology **SMT** p521
Visual gesture recognition **VIS** p101

OPTICAL LINKS AND EQUIPMENT

Analytic and numeric modelling of optical fibre PPM slot and frame spectral properties with application to timing extraction **COM** p379
Conceptual survey of phase modulation based wavelength registered networks **OPT** p53
Direct differential detection of phase-shift-keyed signals: a local-oscillatorless DPSK receiver **OPT** p38
Effect of line coding on heterodyne FSK optical systems with nonuniform laser FM response **OPT** p200
Fibre-based local area network with priority access **COM** p203
Impact of input signals on the bit error rate performance of semiconductor-laser-amplifier-based switch systems **OPT** p265
Jitter in the square synchroniser on direct detection optical communications. Part 1: theoretical analysis **OPT** p209
Low-DC power 2-18 GHz monolithic matrix amplifier **MAP** p440
Multistage optoelectronic switch networks **OPT** p173
Optimum prechirping conditions of externally modulated lasers for transmission on standard fibre **OPT** p363
Performance analysis and sequence designs of synchronous code-division multiple-access systems with multimedia services **COM** p371
Reliability assessment of multiwell distributed feedback laser source for direct detection links at 2.6 Gbit/s **OPT** p133
The SOUT optical intersatellite communication terminal **OPT** p345
Towards an optical ether [optically routed broadband network] **OPT** p327

OPTICAL MATERIALS AND DEVICES

Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda = 1.55\ \mu m$ **OPT** p323
Complex finite difference method applied to the analysis of semiconductor lasers **OPT** p97
Design procedures for passive planar coupled waveguide devices **OPT** p231
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Diffraction grating model for transmission-line laser model of actively mode-locked semiconductor lasers **OPT** p21
Direct determination of main fibre Bragg grating parameters using OLCR **OPT** p141
Effect of side wall roughness in buried channel waveguides **OPT** p242
Fourier coded-aperture imaging in nuclear medicine **SMT** p179
Full-vectorial mode calculations by finite difference method **OPT** p281
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Investigation of new narrow-bandwidth a-Si:H photodetector **OPT** p150
Jitter in the square synchroniser on direct detection optical communications. Part 1: theoretical analysis **OPT** p209
Low-loss fibre-matched diluted multiple quantum well waveguides **OPT** p296
Matching of single-mode fibre to laser diode by microlenses at 1.5 μm wavelength **OPT** p178

Newton-Raphson method for accuracy enhancement of electro-optical targeting system **SMT** p160
Nonlinearities in high-index-coupled λ/4-shifted distributed-feedback semiconductor lasers **OPT** p8
Optical modulators using fibreoptic Sagnac interferometers **OPT** p1
Optical reflection filters based on intracavity quantum well polarisation convertors **OPT** p75
Optically controlled characteristics of an ion-implanted hetero-MIS capacitor **OPT** p27
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Optoelectronic and structural properties of polysilicon produced by excimer laser and furnace crystallisation of hydrogenated amorphous silicon (a-Si:H) **CDS** p15
Optoelectronic differential multiplexer logic based on phototransistors/LEDs and its use in optical systems **OPT** p401
Performance of 1.3 μm ridge waveguide distributed feedback lasers fabricated by one-step metalorganic chemical vapour deposition **OPT** p316
Practical Sagnac interferometer based fibre optic current sensor **OPT** p249
Predicted performance of Franz-Keldysh effect optical reflection modulators and comparisons with similar multiple quantum well-based devices **OPT** p257
Proton-exchange channel waveguide lasers in Nd:$MgO:LiNbO_3$ **OPT** p195
Silicon-on-insulator optical rib waveguides: loss, mode characteristics, bends and y-junctions **OPT** p391
Study on Kerr electro-optic field measurement method for nonuniform three-dimensional electric field **SMT** p418
Travelling wave electrode optimisation for high speed electro-optic modulators using the Fourier series method **OPT** p381

OPTICAL SPECTROSCOPY

Chromatic monitoring for the processing of materials with plasmas **SMT** p99
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Optical technique for measuring the positive and negative dielectrophoretic behaviour of cells and colloidal suspensions **SMT** p395
Piezo-spectroscopic data analysis: a PC tool **SMT** p185
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95

OPTIMAL CONTROL

A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Adaptive optimum start-up and shut-down time controllers for heating systems based on a robust gradient method **CTA** p323
Dynamic programming approach for nonlinear systems **CTA** p409
Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521
Low-order H_∞ suboptimal controllers **CTA** p243
Mixed H_∞ optimisation with model-matching **CTA** p329
Near time-optimal control of nonlinear servomechanisms **CTA** p145
Optimal-current control of convertor-fed DC motors. I. Special case for continuous current with negligible resistance **EPA** p240
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Structural modelling and optimisation of large scale systems **CTA** p1
Total control of fast coordinate measuring machines **CTA** p373
Two-stage suboptimal dual controller for systems with stochastic parameters using optimal predictors **CTA** p255

OPTIMISATION

Adaptive predistortion lineariser using polynomial functions **COM** p49
Complex gradient and Hessian **VIS** p380
Design of an energy efficient motor for irrigation pumps operating under realistic conditions **EPA** p269
Effects of harmonic distortion of the supply voltage on the optimum performance of a thyristor controlled reactor-type compensator **SMT** p15
Efficient method for alleviating voltage limit violations using local optimisation **GTD** p279
Mixed H_∞ optimisation with model-matching **CTA** p329
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
New method of parametric eigenvalue assignment in state feedback control **CTA** p223
Optimisation efficiency in behavioural synthesis **CDS** p399
Optimisation of 670 nm strained-quantum-well laser diodes for high-temperature operation **OPT** p136
Optimisation of MQW structures for acousto-optic absorption modulators **OPT** p62
Optimised synthesis of delay-insensitive circuits using time-sharing **CDT** p111
Parameter identification of inverter drive system **EPA** p303
PID controller design for a TITO system **CTA** p111
Radar detection in K-distributed clutter **RSN** p116
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Structural modelling and optimisation of large scale systems **CTA** p1
Voltage stability indicator for identification of the weakest bus/area in power systems **GTD** p305

PARALLEL PROCESSING

Complete processing system that uses fuzzy logic for ship detection in SAR images **RSN** p181
Distributed system for VLSI layout compaction **CDT** p49
Effect of nonuniform traffic on the performance of multistage interconnection networks **CDT** p169
Efficient parallel pipelinable VLSI architecture for finding the maximum binary number **CDS** p527
Fault-tolerant design methodology for systolic array architectures **CDT** p17
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Guiding instruction scheduling with synchronisation markers on a superscalar based multiprocessor **CDT** p398
Load balancing algorithms for an extended hypercube **CDT** p298
Message optimal fully decentralised evaluation of associative and commutative functions **CDT** p238
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
Parallel decoding of the [23, 12, 7] binary Golay code **CDT** p119
Parallel design of arithmetic coding **CDT** p327
Parallel implementation of IMM tracking algorithm using transputers **RSN** p325
Pipeline ring data-flow architecture for solving large iterative structures **CDT** p212
Preventing tree saturation in multistage networks **CDT** p35
Processor allocation strategies for modified hypercubes **CDT** p196
Radix-2 FFT-pipeline architecture with reduced noise-to-signal ratio **VIS** p81
Robot path planning using VLSI resistive grids **VIS** p267
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
Taxonomy of dynamic task scheduling schemes in distributed computing systems **CDT** p1
Top down structured parallelisation of embedded image processing applications **VIS** p431
Ultrafast pipelined arithmetic using quantum electronic devices **CDT** p104
Unified approach to designing parallel Winograd algorithms **CDT** p161

PARAMETER ESTIMATION

Adaptive allpass filtering for nonminimum-phase system identification **VIS** p373
Adaptive predistortion lineariser using polynomial functions **COM** p49
Analytic and numeric modelling of optical fibre PPM slot and frame spectral properties with application to timing extraction **COM** p379
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Bayesian model selection applied to spatial signal processing **VIS** p76
Channel error profiles for DECT **COM** p413
Comparison of parameter estimators for K-distribution **RSN** p45
Complex gradient and Hessian **VIS** p380
Estimation of general 2D motion using Fourier descriptors **VIS** p115
Estimation of texture parameters in K-distributed clutter **RSN** p196
Extraction and computation of identifiable parameters in robot dynamic models: theory and application **CTA** p48
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
Manifold interpolation for diversely polarised arrays **RSN** p19
Mode-space spatial spectral estimation for circular arrays **RSN** p300
Neural network based parameter estimation of unstable aerospace dynamic systems **CTA** p385
Online system identification using Laguerre series **CTA** p249
Parameter identifiability problem in signal processing **RSN** p133
Parameter identification of inverter drive system **EPA** p303
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Statistical analysis of state-space approach in harmonic retrieval **VIS** p181
Textured image segmentation by context enhanced clustering **VIS** p413
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm **VIS** p339
Two original weight pruning methods based on statistical tests and rounding techniques **VIS** p230
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391
VHF antenna array processing: high accuracy direction finding and performance evaluation with real data **RSN** p137
Visual gesture recognition **VIS** p101

PATTERN RECOGNITION

2D shape signature based on fractal measurements **VIS** p422
Attributed relational tree approach to signal classification **RSN** p319
Classified vector quantisation with variable block-size DCT models **VIS** p39
Colour texture analysis using colour histogram **VIS** p403
Comparison of parameter estimators for K-distribution **RSN** p45
Comparison of some noise-compensation methods for speech recognition in adverse environments **VIS** p280
Complete processing system that uses fuzzy logic for ship detection in SAR images **RSN** p181
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
Distributed arithmetic perceptron **CDS** p382
Estimation of general 2D motion using Fourier descriptors **VIS** p115
Explicit estimation of speech boundaries **SMT** p153
Fast closest codeword search algorithms for vector quantisation **VIS** p143
Fingerprint enhancement by directional Fourier filtering **VIS** p87
Generalised approach to parallelising image sequence coding algorithms **VIS** p438
Generalised block-matching motion estimation using quad-tree structured spatial decomposition **VIS** p446
Hybrid approach to speech recognition using hidden Markov models and Markov chains **VIS** p273
Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Neural network for pattern association in electrical capacitance tomography **CDS** p517
New method for the simulation of correlated K-distributed clutter **RSN** p53
Non-analytic object recognition using the Hough transform with the matching technique **CDT** p11
Nonlinear cepstral equalisation method for noisy speech recognition **VIS** p397
NTSC component separation via Hadamard transform **VIS** p27
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Original approach for the localisation of objects in images **VIS** p245
Partitioned mixture distribution: an adaptive Bayesian network for low-energy image processing **VIS** p251
Speaker-independent isolated word recognition using multiple hidden Markov models **VIS** p197
Superresolution technique with edge-based ringing reduction for passive millimetre-wave images **VIS** p9

Supervised and unsupervised learning in radial basis function classifiers **VIS** p210
Textured image segmentation by context enhanced clustering **VIS** p413
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm **VIS** p339
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

PERFORMANCE EVALUATION

Analysis and simulation of multiple-ring token networks **CDT** p135
Effect of nonuniform traffic on the performance of multistage interconnection networks **CDT** p169
Fault-tolerant design methodology for systolic array architectures **CDT** p17
FSMTEST: synthesis for testability and test generation of PLA-based FSM **CDT** p221
New hybrid MAC-layer protocol for real-time bus networks **COM** p325
Performance analysis of the knockout switch with input buffers **COM** p183
Performance evaluation of BIN/ABIN networks in buffered/unbuffered packet-switched environments **CDT** p29
Preventing tree saturation in multistage networks **CDT** p35
Quick recovery of two embedded complete binary trees in a hypercube **CDT** p205

PHOTOGRAPHIC TECHNIQUES

Diagnostic techniques for atmospheric streamer discharges **SMT** p141

PLASMA INTERACTIONS

Electromagnetic scattering by an impedance cylinder coated eccentrically with a chiroplasma cylinder **MAP** p279

PLASMA TECHNOLOGY

Chromatic monitoring for the processing of materials with plasmas **SMT** p99
Diagnostic techniques for atmospheric streamer discharges **SMT** p141
Diagnostics of DC-pulse SiH_4 plasmas using laser-induced fluorescence and optical emission spectroscopy **SMT** p89
Laser-induced plasmas and resonance ionisation spectroscopies **SMT** p83
Linear-geometry electric-field probe for DC corona measurements **SMT** p111
Simple heat flux density probe for industrial plasmas **SMT** p135
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123
Use of an ion energy analyser-mass spectrometer to measure ion kinetic-energy distributions from RF discharges in argon-helium gas mixtures **SMT** p105

POWER ELECTRONICS

Analysis and implementation of a full-bridge constant-frequency LCC-type parallel resonant converter **EPA** p121
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Calculation of winding losses in high-frequency toroidal inductors using single strand conductors **EPA** p52
CMOS shunt regulator with bandgap reference for automotive environment **CDS** p157
Design and performance of digital polysilicon thin-film-transistor circuits on glass **CDS** p56
Generalised associated discrete circuit model for switching devices **SMT** p57
LLC-type series resonant convertor with PWM control **CDS** p73
Losses in PWM inverters using IGBTs **EPA** p235
Mathematical model of gate-turn-off thyristor for use in circuit simulations **EPA** p284
NMOS and CMOS polysilicon drive circuits for liquid crystal displays **CDS** p50
Power-source element and its properties **CDS** p220
Self-load bank for UPS testing by circulating current method **EPA** p191
Single-phase step-up/down current-source rectifier with suppressed resonance **EPA** p19
Single-phase three-wire transformerless inverter **EPA** p197
Step-up/down three-phase AC to DC convertor with sinusoidal input current and unity power factor **EPA** p77
Theoretical and experimental evaluation of high-voltage CMOS inverters **CDS** p162
Two-dimensional analysis of GTO switching under the influence of external circuit **CDS** p483

POWER ENGINEERING COMPUTING

A new numeric technique for high-speed evaluation of power system frequency **GTD** p529
A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Analysis and implementation of a full-bridge constant-frequency LCC-type parallel resonant converter **EPA** p121
Analysis of electromechanical modes using an artificial neural network **GTD** p198
Application of clustering and factorisation tree techniques for parallel solution of sparse network equations **GTD** p609
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Asymmetrical three-phase load-flow study based on symmetrical component theory **GTD** p248
Benefits of wheeling economy energy in Canada: quantification and sensitivity analysis **GTD** p585
Brushless exciter model **GTD** p61
Computational study of very fast transients in GIS with special reference is effects of trapped charge and risetime on overvoltage amplitude **GTD** p485
Computer-optimised current waveforms for switched-reluctance motors **EPA** p45
Development and implementation of a variable-window algorithm for high-speed and accurate digital distance protection **GTD** p383
Differential transmission of evolution measures in SCADA systems **GTD** p253
Economic emission load dispatch with line flow constraints using a classical technique **GTD** p1
Fast harmonic power flow calculation using parallel processing **GTD** p27
Feasibility of using unsupervised learning, artificial neural networks for the condition monitoring of electrical machines **EPA** p317
Forecasting daily load curves using a hybrid fuzzy-neural approach **GTD** p561
Genetic algorithm solution to the economic dispatch problem **GTD** p377
Genetic and genetic/simulated-annealing approaches to economic dispatch **GTD** p507
Highly stable power supply using digitally controlled phase-controlled rectifier and active filter **EPA** p221
Improved techniques for modelling fault arcs an faulted EHV transmission systems **GTD** p148
Inclusion of weather effects in composite system reliability evaluation using sequential simulation **GTD** p575
Integrated digital power transformer protection **GTD** p323
Intelligent operation of distribution network **GTD** p106
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
Multivariable adaptive control of AC-DC systems **GTD** p658
Neural-network based adaptive single-pole autoreclosure technique for EHV transmission systems **GTD** p155
New approach to current control of AC-to-DC voltage-type convertors **EPA** p275
New technique of network partitioning for voltage collapse margin calculations **GTD** p630
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 2: signal processing **GTD** p141
Optimal-current control of convertor-fed DC motors. I. Special case for continuous current with negligible resistance **EPA** p240
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Parallel processing of sparse power system equations **GTD** p68
Power system network topology error detection **GTD** p623
Real time hysteresis controller for relay testing **EPA** p71
Realtime fault detection and classification in power systems using microprocessors **GTD** p315
Reliability assessment of composite hydrothermal generation and transmission systems using sequential simulation **GTD** p257
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Scheduling of hydroelectric generations using artificial neural networks **GTD** p452
Short-term hydrothermal scheduling. II. Parallel simulated annealing approach **GTD** p502
Speedup and synchronisation overhead analysis of Gauss-Seidel type algorithms on a Sequent balance machine **GTD** p437
Stochastic analysis in the time domain of very high speed digital distance relays. I. Theory **GTD** p161
Substation power-transformer-loading analysis and computer simulations of loadability under realistic operating conditions **GTD** p413
Synthetic loading of three-phase induction motors by magnetic field magnitude modulation **EPA** p95
Synthetic loading of three-phase induction motors using microprocessor controlled power electronics **EPA** p101
Torque harmonics minimisation in permanent magnet synchronous motor with back EMF estimation **EPA** p323
Tower modelling for lightning surge analysis using Electro-Magnetic Transients Program **GTD** p637
Transformer inrush calculations using a coupled electromagnetic model **SMT** p491
Voltage reactive security analysis in power systems with automatic secondary voltage control **GTD** p177

POWER SYSTEM CONTROL

A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Adaptive load shedding for isolated power systems **GTD** p491
Adaptive optimum start-up and shut-down time controllers for heating systems based on a robust gradient method **CTA** p323
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Analysis and control of torque ripples in inverter-fed permanent-magnet synchronous motors using the electromechanical spring-stiffness coefficient $\partial T_e/\partial\theta$ **EPA** p169
Analysis and implementation of a full-bridge constant-frequency LCC-type parallel resonant converter **EPA** p121
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Bilinear self-tuning control of a high temperature heat treatment plant **CTA** p12
Design of universal variable-structure controller for dynamic stabilisation of power systems **GTD** p363
Differential transmission of evolution measures in SCADA systems **GTD** p253
Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521
Efficient method for alleviating voltage limit violations using local optimisation **GTD** p279
Enhanced Newton-Raphson algorithm for normal, controlled and optimal power-flow solutions using column exchange techniques **GTD** p647
Global robust adaptive control of power systems **GTD** p429
High-performance controllers for HVDC transmission links **GTD** p422
Highly stable power supply using digitally controlled phase-controlled rectifier and active filter **EPA** p221
Integrated digital power transformer protection **GTD** p323
Intelligent operation of distribution network **GTD** p106
LLC-type series resonant convertor with PWM control **CDS** p73
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Multivariable adaptive control of AC-DC systems **GTD** p658
Negative-phase-sequence reduction with adjacent static reactive-power compensators **EPA** p259
New approach to current control of AC-to-DC voltage-type convertors **EPA** p275
New robust adaptive load-frequency control with system parametric uncertainties **GTD** p184

New technique of network partitioning for voltage collapse margin calculations **GTD** p630
Optimal-current control of convertor-fed DC motors. I. Special case for continuous current with negligible resistance **EPA** p240
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Parameter sensitivity of procedures for on-line adaptation of the rotor time constant of induction machines with field oriented control **EPA** p353
Power system network topology error detection **GTD** p623
Power system stabilisation using the dominant subsystem principle **GTD** p243
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Robust nonlinear control of heating plant **CTA** p227
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Single-phase step-up/down current-source rectifier with suppressed resonance **EPA** p19
Single-phase three-wire transformerless inverter **EPA** p197
Space vector control of a unified compensator for nonactive power **EPA** p207
Step-up/down three-phase AC to DC convertor with sinusoidal input current and unity power factor **EPA** p77
Thyristor controlled susceptances for balancing compensators operated under nonsinusoidal conditions **EPA** p177
Torque harmonics minimisation in permanent magnet synchronous motor with back EMF estimation **EPA** p323
Voltage reactive security analysis in power systems with automatic secondary voltage control **GTD** p177

POWER SYSTEM MANAGEMENT

A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Adaptive load shedding for isolated power systems **GTD** p491
Analysis of electromechanical modes using an artificial neural network **GTD** p198
Analysis of GTO-based static VAr compensators **EPA** p293
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Asymmetrical three-phase load-flow study based on symmetrical component theory **GTD** p248
Benefits of wheeling economy energy in Canada: quantification and sensitivity analysis **GTD** p585
Cost-effectiveness of hybrid and unified compensators of nonactive power in networks **EPA** p39
Design of universal variable-structure controller for dynamic stabilisation of power systems **GTD** p363
Differential transmission of evolution measures in SCADA systems **GTD** p253
Economic emission load dispatch with line flow constraints using a classical technique **GTD** p1
Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521
Efficient method for alleviating voltage limit violations using local optimisation **GTD** p279
Electricity restriction costs **GTD** p299
Enhanced Newton-Raphson algorithm for normal, controlled and optimal power-flow solutions using column exchange techniques **GTD** p647
Genetic algorithm solution to the economic dispatch problem **GTD** p377
Genetic and genetic/simulated-annealing approaches to economic dispatch **GTD** p507
Global robust adaptive control of power systems **GTD** p429
High-performance controllers for HVDC transmission links **GTD** p422
Intelligent operation of distribution network **GTD** p106
Maximum efficiency of interconnected transmission lines **GTD** p353
Model-based fuzzy control of power system static/dynamic security using the pattern recognition approach **GTD** p270
Modelling risk in energy contracts with investor owned generation **GTD** p75
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
Multivariable adaptive control of AC-DC systems **GTD** p658
Negative-phase-sequence reduction with adjacent static reactive-power compensators **EPA** p259
Neural-network based adaptive single-pole autoreclosure technique for EHV transmission systems **GTD** p155
New robust adaptive load-frequency control with system parametric uncertainties **GTD** p184
New single-phase active power filter **EPA** p129
New technique of network partitioning for voltage collapse margin calculations **GTD** p630
Novel method for solving radial distribution networks **GTD** p291
Power based algorithm to provide loss of grid protection for embedded generation **GTD** p640
Power system network topology error detection **GTD** p623
Power system stabilisation using the dominant subsystem principle **GTD** p243
Prediction of customer load point service reliability worth estimates in an electric power system **GTD** p390
Probability distribution approach to describe customer costs due to electric supply interruptions **GTD** p594
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Space vector control of a unified compensator for nonactive power **EPA** p207
Speedup and synchronisation overhead analysis of Gauss-Seidel type algorithms on a Sequent balance machine **GTD** p437
Static VAr compensator with fully controlled reactors **EPA** p264
Substation power-transformer-loading analysis and computer simulations of loadability under realistic operating conditions **GTD** p413
Thermal unit commitment using genetic algorithms **GTD** p459
Thyristor controlled susceptances for balancing compensators operated under nonsinusoidal conditions **EPA** p177
Uncertainty considerations in the pool purchase price in the England and Wales electricity supply industry **GTD** p125
Voltage reactive security analysis in power systems with automatic secondary voltage control **GTD** p177
Voltage stability indicator for identification of the weakest bus/area in power systems **GTD** p305

POWER SYSTEM PROTECTION

A parallel processing algorithm for co-ordination of directional overcurrent relays in interconnected power systems **GTD** p514
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Complex short circuit MVA method for power system studies **GTD** p81
Development and implementation of a variable-window algorithm for high-speed and accurate digital distance protection **GTD** p383
Fast identification of symmetrical components by use of a state observer **GTD** p617
High-voltage fuse behaviour with varistor commutation **GTD** p33
High-voltage insulation co-ordination: timelags of parallel-plate, rod-plane, rod-rod gaps, cap and pin insulators and surge diverter **GTD** p397
Hybrid AC superconducting current limiter: small-scale experimental model **GTD** p117
Improved techniques for modelling fault arcs an faulted EHV transmission systems **GTD** p148
Improvement on GGDF for power system security evaluation **GTD** p85
Influence of humidity on the breakdown mechanism of medium length rod-plane gaps stressed by positive impulse voltages **SMT** p407
Intelligent operation of distribution network **GTD** p106
Neural-network based adaptive single-pole autoreclosure technique for EHV transmission systems **GTD** p155
New approach to distance protection for resistive double-phase to earth faults using adaptive techniques **GTD** p369
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 1: signal measurement **GTD** p133
Power based algorithm to provide loss of grid protection for embedded generation **GTD** p640
Real time hysteresis controller for relay testing **EPA** p71
Realtime fault detection and classification in power systems using microprocessors **GTD** p315
Stochastic analysis in the time domain of very high speed digital distance relays. I. Theory **GTD** p161

POWER SYSTEMS AND APPLICATIONS

Acoustic noise of electromagnetic origin in an ideal frequency-converter-driven induction motor **EPA** p341
Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
CMOS shunt regulator with bandgap reference for automotive environment **CDS** p157
Design of an energy efficient motor for irrigation pumps operating under realistic conditions **EPA** p269
Effect of rotor dimensions and cross magnetisation on L_d and L_q inductances of reluctance synchronous machine with cageless flux barrier rotor **EPA** p213
Electromagnetic compatibility in the automotive environment **SMT** p252
Empirical thermal model for inverter-driven cage induction machines **EPA** p360
Field-weakening performance of brushless synchronous AC motor drives **EPA** p331
Improvement of induction machine stability by modulation techniques **EPA** p347
Parameter identification of inverter drive system **EPA** p303

POWER SYSTEMS AND PLANTS

A new numeric technique for high-speed evaluation of power system frequency **GTD** p529
Acoustic noise of electromagnetic origin in an ideal frequency-converter-driven induction motor **EPA** p341
Adaptive load shedding for isolated power systems **GTD** p491
Analysis of electromechanical modes using an artificial neural network **GTD** p198
Analysis of GTO-based static VAr compensators **EPA** p293
Application of clustering and factorisation tree techniques for parallel solution of sparse network equations **GTD** p609
Application of state feedback with integral control to pulse-width modulated push-pull DC-DC convertor **CTA** p99
Application of wind speed forecasting to the integration of wind energy into a large scale power system **GTD** p357
Brushless exciter model **GTD** p61
Characterising the discharge development due to surface contamination in GIS using the UHF technique **SMT** p118
CMOS shunt regulator with bandgap reference for automotive environment **CDS** p157
Complex short circuit MVA method for power system studies **GTD** p81
Computational study of very fast transients in GIS with special reference is effects of trapped charge and risetime on overvoltage amplitude **GTD** p485
Consideration of dependent outages in security-constrained adequacy evaluation of composite systems **GTD** p47
Cost-effectiveness of hybrid and unified compensators of nonactive power in networks **EPA** p39
Effect of rotor dimensions and cross magnetisation on L_d and L_q inductances of reluctance synchronous machine with cageless flux barrier rotor **EPA** p213
Effect of the battery energy storage system on the time-of-use rates industrial customers **GTD** p521
Effects of harmonic distortion of the supply voltage on the optimum performance of a thyristor controlled reactor-type compensator **SMT** p15
Electromagnetic compatibility in the automotive environment **SMT** p252
Empirical thermal model for inverter-driven cage induction machines **EPA** p360
Equal-area criterion: an extension for multimachine power systems **GTD** p191
Fast harmonic power flow calculation using parallel processing **GTD** p27
Fast identification of symmetrical components by use of a state observer **GTD** p617
Field-weakening performance of brushless synchronous AC motor drives **EPA** p331
Forecasting daily load curves using a hybrid fuzzy-neural approach **GTD** p561
Fuzzy linear programming: an application to hydroelectric generation scheduling **GTD** p568
Generalised convertor models for iterative harmonic analysis in power systems **GTD** p445
High-voltage insulation co-ordination: timelags of parallel-plate, rod-plane, rod-rod gaps, cap and pin insulators and surge diverter **GTD** p397
High voltage substation equivalent circuits in the lightning performance estimation **GTD** p99
Improved techniques for modelling fault arcs an faulted EHV transmission systems **GTD** p148
Improvement of induction machine stability by modulation techniques **EPA** p347
Improvement on GGDF for power system security evaluation **GTD** p85
Inclusion of weather effects in composite system reliability evaluation using sequential simulation **GTD** p575

Integer-linear-programming eigenvector-based approach for multipartitioning power system state-estimation networks **GTD** p11
Interactive fuzzy satisfying method for optimal multi-objective VAr planning in power systems **GTD** p554
Low-power optical current measurement system employing a hybrid transmitter **SMT** p129
Modelling and output power optimisation of a wind turbine driven double output induction generator **EPA** p33
Multiobjective generation scheduling using fuzzy optimal search technique **GTD** p233
Multiobjective VAr planning using the goal-attainment method **GTD** p227
Negative-phase-sequence reduction with adjacent static reactive-power compensators **EPA** p259
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 1: signal measurement **GTD** p133
Numerical methods for stable implementation of generating-unit deconvolution **GTD** p219
Parallel processing of sparse power system equations **GTD** p68
Parameter identification of inverter drive system **EPA** p303
Predictive assessment of bulk-system-reliability performance indices **GTD** p466
Probabilistic approach to transient stability evaluation **GTD** p537
Probabilistic iterative harmonic analysis of power systems **GTD** p329
Realtime fault detection and classification in power systems using microprocessors **GTD** p315
Reliability assessment of composite hydrothermal generation and transmission systems using sequential simulation **GTD** p257
Scheduling of hydroelectric generations using artificial neural networks **GTD** p452
Short-term hydrothermal scheduling. II. Parallel simulated annealing approach **GTD** p502
Short-term hydrothermal scheduling part. I. Simulated annealing approach **GTD** p497
Space vector control of a unified compensator for nonactive power **EPA** p207
Static VAr compensator with fully controlled reactors **EPA** p264
Substation power-transformer-loading analysis and computer simulations of loadability under realistic operating conditions **GTD** p413
SVD technique for estimation of harmonic components in a power system: a statistical approach **GTD** p473
Thermal unit commitment using genetic algorithms **GTD** p459
Transient stability evaluation of multimachine power systems: a probabilistic approach based upon the extended equal area criterion **GTD** p545
Voltage reactive security analysis in power systems with automatic secondary voltage control **GTD** p177
Voltage stability as affected by discrete changes in the topology of power networks **GTD** p346
Voltage stability assessment of isolated power systems with power electronic converters **GTD** p310

POWER TRANSMISSION AND DISTRIBUTION

Analysis of transformer-generator interaction in the harmonic domain **GTD** p38
Application of GTO voltage-source inverter for tapping HVDC power **GTD** p19
Benefits of wheeling economy energy in Canada: quantification and sensitivity analysis **GTD** p585
Corona space charge development for combined alternating and direct voltage excitation **SMT** p441
Electricity restriction costs **GTD** p299
High-performance controllers for HVDC transmission links **GTD** p422
Ignition of an electrical arc in a capillary: arc parameters in the initial period **GTD** p480
Improved techniques for modelling fault arcs an faulted EHV transmission systems **GTD** p148
Intelligent operation of distribution network **GTD** p106
Maximum efficiency of interconnected transmission lines **GTD** p353
Multivariable adaptive control of AC-DC systems **GTD** p658
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 2: signal processing **GTD** p141
Novel finite-element analysis of space-charge modified fields **SMT** p369
Novel method for solving radial distribution networks **GTD** p291
Reliability assessment of composite hydrothermal generation and transmission systems using sequential simulation **GTD** p257

PREDICTIVE CONTROL

Bilinear self-tuning control of a high temperature heat treatment plant **CTA** p12
Constrained stable generalised predictive control **CTA** p274
Decoupling design of multivariable generalised predictive control **CTA** p197
GMV technique for nonlinear control with neural networks **CTA** p57
Kernels of anticausal operators and the multivariable generalised predictive control problem **CTA** p181
Numerical robustness and efficiency of generalised predictive control algorithms with guaranteed stability **CTA** p154
Stabilising properties of constrained predictive control **CTA** p295
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70
Torque harmonics minimisation in permanent magnet synchronous motor with back EMF estimation **EPA** p323

PROBABILITY AND STATISTICS

Adaptive two-stage maximum likelihood estimation for cellular radio **COM** p39
Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Analysis and comparison of two order statistics CFAR systems **RSN** p109
Analysis and simulation of multiple-ring token networks **CDT** p135
Bandwidth tradeoffs among coding, processing gain and modulation in frequency-hopped multiple access communications **COM** p63
Bayesian model selection applied to spatial signal processing **VIS** p76
Channel error profiles for DECT **COM** p413
Collaborative coding and decoding techniques for multiple access channel **COM** p56
Colour texture analysis using colour histogram **VIS** p403
Comparison of known signal detection schemes under a weakly dependent noise model **VIS** p303
Comparison of parameter estimators for K-distribution **RSN** p45
Comparison of some noise-compensation methods for speech recognition in adverse environments **VIS** p280
Connectivity properties of a random radio network **COM** p289
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
Design and performance analysis of input-output buffering delta-based ATM switch with backpressure mechanism **COM** p255
Dielectric strength of air insulation for coordination of minimum clearances of overhead lines: a review **SMT** p449
Differential transmission of evolution measures in SCADA systems **GTD** p253
Discrete queueing analysis of a star network **COM** p275
Estimation of texture parameters in K-distributed clutter **RSN** p196
Fast time-series adaptive-filtering algorithm based on the QRD inverse-updates method **VIS** p325
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
Frequency hopped spread spectrum multiple access over cellular dispersive fading channels **COM** p79
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
Hybrid approach to speech recognition using hidden Markov models and Markov chains **VIS** p273
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
Inclusion of weather effects in composite system reliability evaluation using sequential simulation **GTD** p575
Jitter in the square synchroniser on direct detection optical communications. Part I: theoretical analysis **OPT** p209
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p265
MLSE differential phase detection for M-ary DPSK **COM** p407
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Multilevel ternary line codes with trellis structure **COM** p7
New method for the simulation of correlated K-distributed clutter **RSN** p53
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Optimum detection of moderately fluctuating radar targets **RSN** p164
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Partitioned mixture distribution: an adaptive Bayesian network for low-energy image processing **VIS** p251
Performance analysis of a multicast packet switch with capacity m **COM** p177
Performance analysis of an ATM statistical multiplexer with batch arrivals **COM** p190
Performance analysis of ATM switches using priority schemes **COM** p248
Performance analysis of the knockout switch with input buffers **COM** p183
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Performance of joint trellis-coded quantisation/modulation with a Bayes receiver **COM** p13
Performance of scheduling algorithms for channel reservation **CDT** p341
Performance of some generalised modified order statistics CFAR detectors with automatic censoring technique in multiple target situations **RSN** p205
Probabilistic approach to transient stability evaluation **GTD** p537
Probabilistic iterative harmonic analysis of power systems **GTD** p329
Probability distribution approach to describe customer costs due to electric supply interruptions **GTD** p594
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Recursive single-most-likely-replacement channel equaliser **VIS** p185
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Sequential decoding of convolutional codes by a compressed multiple queue algorithm **COM** p212
Some digital receivers for the GSM pan-European cellular communication system **COM** p168
Speaker-independent isolated word recognition using multiple hidden Markov models **VIS** p197
Statistical analysis of state-space approach in harmonic retrieval **VIS** p181
Stochastic analysis in the time domain of very high speed digital distance relays. I. Theory **GTD** p161
SVD technique for estimation of harmonic components in a power system: a statistical approach **GTD** p473
Textured image segmentation by context enhanced clustering **VIS** p413
Transient stability evaluation of multimachine power systems: a probabilistic approach based upon the extended equal area criterion **GTD** p545
Transmission of compressed voice over integrated services frame relay networks: priority service and adaptive buildout delay **COM** p265
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

PRODUCTION ENGINEERING

Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Application of ultrasound to the NDT of solid insulation **SMT** p20
Arc voltage sensor for monitoring of penetration in TIG welds **SMT** p513
Cellular automata as a BIST structure for testing CMOS circuits **CDT** p41
Chip level fault location using X-algorithm **CDT** p259
Current measurement using compensated coaxial shunts **SMT** p471
Decision-theoretic approach to visual inspection using neural networks **VIS** p223
High frequency and high resolution capacitance measuring circuit for process tomography **CDS** p215
Inclusion of weather effects in composite system reliability evaluation using sequential simulation **GTD** p575
Main-beam reduction for compact range imaging **MAP** p461
Microway: a structured design exercise for teaching microprocessor applications **SMT** p547
Prediction of customer load point service reliability worth estimates in an electric power system **GTD** p390
Predictive assessment of bulk-system-reliability performance indices **GTD** p466
Probability distribution approach to describe customer costs due to electric supply interruptions **GTD** p594
Reliability assessment of multiwell distributed feedback laser source for direct detection links at 2.6 Gbit/s **OPT** p133
Review of chemical indicators of degradation of cellulosic electrical paper insulation in oil-filled transformers **SMT** p324
Supervised learning control of a nonlinear polymerisation reactor using the CMAC neural network for knowledge storage **CTA** p33
Synchronised servomechanisms—the scalar-field approach **CTA** p261

Tuning interactions of cascaded-frequency selective-slot arrays **MAP** p290
Two-centre tree topologies for metropolitan area networks **COM** p280
Vision-based gauge for online weld profile metrology **SMT** p521

PROGRAMMING SUPPORT

Flexibility in interface development **CDT** p93
Integrated architectures for database interface development **CDT** p73
Representation and use of task knowledge in a user interface design environment **CDT** p79

PROGRAMMING THEORY

Constant-division algorithms **CDT** p334
Minimisation of control store width in digital systems **CDT** p243
Minimisation of fixed-polarity AND/XOR canonical networks **CDT** p369
Non-analytic object recognition using the Hough transform with the matching technique **CDT** p11
Numerical robustness and efficiency of generalised predictive control algorithms with guaranteed stability **CTA** p154
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
Performance evaluation of BIN/ABIN networks in buffered/unbuffered packet-switched environments **CDT** p29
Public-key cryptosystem design based on factoring and discrete logarithms **CDT** p193

QUANTUM OPTICS

Field statistics modelling of beat noise in an optical amplifier **OPT** p185

RADAR AND RADIONAVIGATION

Aircraft geometric height computation using secondary surveillance radar range differences **RSN** p119
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Attributed relational tree approach to signal classification **RSN** p319
Characterisation of microwave four-parameter materials and its application in wideband radar absorber design **RSN** p337
Circular depolarisation ratio of radar returns from rain: validity of the second-order solution of RT equation **MAP** p257
Coherent processing of ultra-wideband radar signals **RSN** p171
Comparison between linear FM and phase-coded CW radars **RSN** p230
Complete processing system that uses fuzzy logic for ship detection in SAR images **RSN** p181
Critical distance and the performance of sensor array geometries **RSN** p333
Dichroic design for the orbiting VLBI earth station antenna **MAP** p181
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Growler detection in sea clutter using Gaussian spectrum models **RSN** p285
Impact of technology on the defeat of the U-boat September 1939-May 1943 **SMT** p343
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
M-sweeps detection analysis of cell-averaging CFAR processors in multiple-target situations **RSN** p103
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
Medium PRF set selection: an approach through combinatorics **RSN** p307
Methodology for accurate free-space characterisation of radar absorbing materials **SMT** p538
Multisensor, multisite tracking filter **RSN** p75
Performance of some generalised modified order statistics CFAR detectors with automatic censoring technique in multiple target situations **RSN** p205
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
Precision of radio reflector surfaces adjusted from theodolite-tape measurements **MAP** p23
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Recursive super-resolution algorithm for low-elevation target angle tracking in multipath **RSN** p223
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253
Switching system for single antenna operation of an S-band FMCW radar **RSN** p241

RADAR CLUTTER

Analysis and comparison of two order statistics CFAR systems **RSN** p109
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Coherent processing of ultra-wideband radar signals **RSN** p171
Comparison of parameter estimators for K-distribution **RSN** p45
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Estimation of texture parameters in K-distributed clutter **RSN** p196
Growler detection in sea clutter using Gaussian spectrum models **RSN** p285
M-sweeps detection analysis of cell-averaging CFAR processors in multiple-target situations **RSN** p103
Measurement preprocessing approach for target tracking in a cluttered environment **RSN** p151
New method for the simulation of correlated K-distributed clutter **RSN** p53
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Radar detection in K-distributed clutter **RSN** p116

RADAR THEORY

Absorption in a semi-infinite lossy medium over a range of widely varying parameters **SMT** p31
Analysis and comparison of two order statistics CFAR systems **RSN** p109
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Attributed relational tree approach to signal classification **RSN** p319
Carrier-free radar signal design with MTI Doppler processor **RSN** p59
Circular depolarisation ratio of radar returns from rain: validity of the second-order solution of RT equation **MAP** p257
Coherent processing of ultra-wideband radar signals **RSN** p171
Comparison between linear FM and phase-coded CW radars **RSN** p230
Comparison of parameter estimators for K-distribution **RSN** p45
Description of radar targets using the bispectrum **RSN** p159
Edge-wave diffraction for flat-plate structures **MAP** p30
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Estimation of texture parameters in K-distributed clutter **RSN** p196
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
Investigation of trellis based filters for tracking **RSN** p9
M-sweeps detection analysis of cell-averaging CFAR processors in multiple-target situations **RSN** p103
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
Measurement preprocessing approach for target tracking in a cluttered environment **RSN** p151
New method for the simulation of correlated K-distributed clutter **RSN** p53
Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Optimum detection of moderately fluctuating radar targets **RSN** p164
Performance of some generalised modified order statistics CFAR detectors with automatic censoring technique in multiple target situations **RSN** p205
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
Radar detection in K-distributed clutter **RSN** p116
Recursive super-resolution algorithm for low-elevation target angle tracking in multipath **RSN** p223
Stability of a decoupled tracking filter with pseudomeasurements in line-of-sight Cartesian co-ordinate system **RSN** p2

RADIO DIRECTION-FINDING

Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Manifold interpolation for diversely polarised arrays **RSN** p19
Split spread-spectrum technique for flexible use of frequency bands **RSN** p65
VHF antenna array processing: high accuracy direction finding and performance evaluation with real data **RSN** p137

RADIO SYSTEMS

Adaptive borrowing of ordered resources for the pan-European mobile communication (GSM) system **COM** p93
Adaptive predistortion lineariser using polynomial functions **COM** p49
Adaptive two-stage maximum likelihood estimation for cellular radio **COM** p39
Alternative to NASA's concatenated coding system for the Galileo mission **COM** p229
Approximate analysis of a dynamic-channel-assignment scheme with handoffs **COM** p89
Bandwidth tradeoffs among coding, processing gain and modulation in frequency-hopped multiple access communications **COM** p63
Capacity of a cellular time division duplex CDMA system **COM** p351
Channel error profiles for DECT **COM** p413
Characterisation of electromagnetically coupled superquadric loop antennas for mobile communications applications **MAP** p85
Connectivity properties of a random radio network **COM** p289
Contributions towards the development of a UTD-based model for cellular radio propagation prediction **MAP** p407
Correction of satellite beacon propagation data using radiometer measurements **MAP** p62
Dichroic design for the orbiting VLBI earth station antenna **MAP** p181
Effect of delay mismatch on a feedforward amplifier **CDS** p140
Electromagnetic compatibility of radio telecommunications equipment **SMT** p244
Enhanced channel coding using source criteria in speech coders **VIS** p191
Error performance for diversity DS-SSMA communications in fading channels **COM** p357
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Frequency hopped spread spectrum multiple access over cellular dispersive fading channels **COM** p79
Further results on receivers for the nonlinear channel including pre- and post-nonlinearity filtering **COM** p334
Generalised likelihood-ratio detection of multiple-hop frequency-hopping signals **COM** p70
Impact of technology on the defeat of the U-boat September 1939-May 1943 **SMT** p343
Maximum frequency and optimum performance of class E power amplifiers **CDS** p174
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Performance analysis for a convolutionally coded DPSK meteor-burst communication system **COM** p223
Performance analysis of a slow FH/MFSK acquisition scheme in random partial band noise jamming **COM** p396
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Prediction of attenuation on satellite-Earth links for systems operating with low fade margins **MAP** p467
Recursive single-most-likely-replacement channel equaliser **VIS** p185
Simplified error bound analysis for M-DPSK in fading channels with diversity reception **COM** p341
Some digital receivers for the GSM pan-European cellular communication system **COM** p168
Synthesis of vehicular antenna NVIS radiation patterns using the method of characteristic modes **MAP** p151
The SOUT optical intersatellite communication terminal **OPT** p345
Theoretical study of the evaporation duct effects on satellite-to-ship radio links near the horizon **MAP** p272
Trellis coded Q^2PSK signals. 2. Land mobile satellite fading channels **COM** p159

Trellis coded Q^2PSK signals. I. AWGN and nonlinear satellite channels **COM** p151
Triple correlation analysis of binary sequences for codeword detection **VIS** p297
Use of radiometers in atmospheric attenuation measurements **MAP** p428

RADIOWAVE PROPAGATION

Characterisation of electromagnetically coupled superquadric loop antennas for mobile communications applications **MAP** p85
Circular depolarisation ratio of radar returns from rain: validity of the second-order solution of RT equation **MAP** p257
Concatenated codes using multilevel structures for PSK signalling over the Rayleigh fading channel **COM** p233
Contributions towards the development of a UTD-based model for cellular radio propagation prediction **MAP** p407
Correction of satellite beacon propagation data using radiometer measurements **MAP** p62
Error performance for diversity DS-SSMA communications in fading channels **COM** p357
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
Measurements and predictions of attenuation and scatter of microwave signals by trees **MAP** p70
Modelling and measurements of the diffraction of microwaves by buildings **MAP** p397
Optimum modulation and diversity for DS-SS communication over Rayleigh fading channels subject to pulse burst interference **COM** p237
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Performance of joint trellis-coded quantisation/modulation with a Bayes receiver **COM** p13
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
Prediction of attenuation on satellite-Earth links for systems operating with low fade margins **MAP** p467
Synthesis of vehicular antenna NVIS radiation patterns using the method of characteristic modes **MAP** p151
Theoretical analysis of VHF-UHF propagation through air-vegetation-ground media **MAP** p415
Theoretical study of the evaporation duct effects on satellite-to-ship radio links near the horizon **MAP** p272
Transition zone diffraction by multiple edges **MAP** p382
Trellis coded Q^2PSK signals. 2. Land mobile satellite fading channels **COM** p159
Use of radiometers in atmospheric attenuation measurements **MAP** p428

SELF-ADJUSTING SYSTEMS

Adaptive control of discrete systems using neural networks **CTA** p209
Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Adaptive load shedding for isolated power systems **GTD** p491
Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Adaptive optimum start-up and shut-down time controllers for heating systems based on a robust gradient method **CTA** p323
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Bilinear self-tuning control of a high temperature heat treatment plant **CTA** p12
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Global robust adaptive control of power systems **GTD** p429
GMV technique for nonlinear control with neural networks **CTA** p57
High-performance controllers for HVDC transmission links **GTD** p422
Multivariable adaptive control of AC-DC systems **GTD** p658
New robust adaptive load-frequency control with system parametric uncertainties **GTD** p184
New robust model reference adaptive control algorithm **CTA** p177
Online system identification using Laguerre series **CTA** p249
PID controller design for a TITO system **CTA** p111
Power system stabilisation using the dominant subsystem principle **GTD** p243
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
Self-tuning load frequency control: multilevel adaptive approach **GTD** p285
Self tuning of computed torque gains by using neural networks with flexible structures **CTA** p235
Supervised learning control of a nonlinear polymerisation reactor using the CMAC neural network for knowledge storage **CTA** p33

SEMICONDUCTOR DEVICE MODELLING

Analytical extraction method for submicron MOS transistor model parameters in the linear region **CDS** p457
Base current reversal in bipolar transistors and circuits: a review and update **CDS** p299
Complex pole expansion approach to multimode DFB laser modelling **OPT** p271
Degradation in on-state characteristics of IGBTs through self-heating **CDS** p439
High-field effects in polysilicon thin-film transistors **CDS** p45
Hot-hole-induced degradation in polycrystalline silicon thin-film transistors: experimental and theoretical analysis **CDS** p33
Implementing high-order continuity and rate dependence in SPICE models **CDS** p251
Improved passive model for transient prediction of GaAs E/D MESFET analogue switches **CDS** p105
MOS analogue circuit simulation with SPICE **CDS** p265
Optically controlled characteristics of an ion-implanted hetero-MIS capacitor **OPT** p27
Performance characterisation of a microwave transistor **CDS** p337
Recombination and Joule heating effects in GTO thyristors with spatially varying lifetimes **CDS** p292
Simulation-based parameter extraction, its implementation and some applications **CDS** p129
Two-dimensional temperature modelling of DH laser diodes using the transmission-line modelling (TLM) method **SMT** p7

SEMICONDUCTOR DEVICES AND MATERIALS

Analytical model for the AlGaAs/GaAs multiemitter finger HBT including self-heating and thermal coupling effects **CDS** p469
Base current reversal in bipolar transistors and circuits: a review and update **CDS** p299
Coplanar waveguide two-stage balanced MMIC amplifier using impedance-transforming lumped-distributed branchline couplers **MAP** p241
Current measurement using compensated coaxial shunts **SMT** p471
Degradation in on-state characteristics of IGBTs through self-heating **CDS** p439
Effect of side wall roughness in buried channel waveguides **OPT** p242
Implementing high-order continuity and rate dependence in SPICE models **CDS** p251
Improved passive model for transient prediction of GaAs E/D MESFET analogue switches **CDS** p105
In-situ phosphorous-doped VLPCVD polysilicon layers for polysilicon thin-film transistors **CDS** p19
Large-area shower implanter for thin-film transistors **CDS** p23
Losses in PWM inverters using IGBTs **EPA** p235
Modelling of propagation delays in the bilevel crossing interconnections on the GaAs-based integrated circuits **CDS** p185
Optically controlled characteristics of an ion-implanted hetero-MIS capacitor **OPT** p27
Optoelectronic and structural properties of polysilicon produced by excimer laser and furnace crystallisation of hydrogenated amorphous silicon (a-Si:H) **CDS** p15
Recombination and Joule heating effects in GTO thyristors with spatially varying lifetimes **CDS** p292
Simulation-based parameter extraction, its implementation and some applications **CDS** p129
Two-dimensional analysis of GTO switching under the influence of external circuit **CDS** p483

SEMICONDUCTOR LASERS

Analysis of the all-electrical automatic gain control of travelling-wave semiconductor laser amplifiers **OPT** p65
Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda = 1.55$ μm **OPT** p323
Comparison of different DFB laser models within the European COST 240 collaboration **OPT** p82
Complex finite difference method applied to the analysis of semiconductor lasers **OPT** p97
Complex pole expansion approach to multimode DFB laser modelling **OPT** p271
Control of nearly degenerate four-wave mixing in a distributed feedback semiconductor laser amplifier via coherent electrical modulation **OPT** p33
Density matrix model for highly nondegenerate four-wave mixing in semiconductor laser devices **OPT** p119
Diffraction grating model for transmission-line laser model of actively mode-locked semiconductor lasers **OPT** p21
Discussion of the linewidth enhancement factor α of GaAs/GaAlAs quantum well lasers **OPT** p311
Gain measurement of semiconductor laser diodes: requirements for the wavelength resolution and sensitivity to noise **OPT** p13
Impact of input signals on the bit error rate performance of semiconductor-laser-amplifier-based switch systems **OPT** p265
Intensity noise and linewidth characteristics of laser diodes with phase conjugate optical feedback **OPT** p103
Linewidth enhancement in laser diodes caused by temperature fluctuations **OPT** p191
Linewidth of gain-coupled distributed feedback lasers **OPT** p49
Matching of single-mode fibre to laser diode by microlenses at 1.5 μm wavelength **OPT** p178
Nonlinearities in high-index-coupled $\lambda/4$-shifted distributed-feedback semiconductor lasers **OPT** p8
Optimisation of 670 nm strained-quantum-well laser diodes for high-temperature operation **OPT** p136
Optimum prechirping conditions of externally modulated lasers for transmission on standard fibre **OPT** p363
Performance improvement of MOSFET lasers by using trapezoidal gate MOSFETs **CDS** p69
Performance of 1.3 μm ridge waveguide distributed feedback lasers fabricated by one-step metalorganic chemical vapour deposition **OPT** p316
Reliability assessment of multiwell distributed feedback laser source for direct detection links at 2.6 Gbit/s **OPT** p133
Simple method for estimating the memory diagram in single mode semiconductor lasers **OPT** p109
Static and dynamic characteristics of MQW DFB lasers with varying ridge width **OPT** p303
Temporal and spectral gain dynamics in an actively modelocked semiconductor laser **OPT** p127
Transmission-line delay limitations of laser bandwidths **OPT** p163
Two-dimensional temperature modelling of DH laser diodes using the transmission-line modelling (TLM) method **SMT** p7

SEMICONDUCTOR TECHNOLOGY

Optically controlled characteristics of an ion-implanted hetero-MIS capacitor **OPT** p27

SIGNAL DETECTION

Comparison of known signal detection schemes under a weakly dependent noise model **VIS** p303
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Explicit estimation of speech boundaries **SMT** p153
Generalised likelihood-ratio detection of multiple-hop frequency-hopping signals **COM** p70
Growler detection in sea clutter using Gaussian spectrum models **RSN** p285
M-sweeps detection analysis of cell-averaging CFAR processors in multiple-target situations **RSN** p103
Multilevel quantisation and fusion scheme for the decentralised detection of an unknown signal **RSN** p37
New method for the simulation of correlated K-distributed clutter **RSN** p53

Optimum classification of non-Gaussian processes using neural networks **VIS** p56
Optimum detection of moderately fluctuating radar targets **RSN** p164
Performance analysis of a slow FH/MFSK acquisition scheme in random partial band noise jamming **COM** p396
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Performance of some generalised modified order statistics CFAR detectors with automatic censoring technique in multiple target situations **RSN** p205
Radar detection in K-distributed clutter **RSN** p116
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253
Study of the detection and resolution capabilities of a one-dimensional array of sensors by using differential geometry **RSN** p83
Triple correlation analysis of binary sequences for codeword detection **VIS** p297

SIGNAL GENERATORS

Approach to the synthesis of canonic RC-active oscillators using CCII **CDS** p493
Current transistor-transistor-inductor oscillator **CDS** p498
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253

SIGNAL PROCESSING

Adaptive allpass filtering for nonminimum-phase system identification **VIS** p373
Adaptive predistortion linearisers using polynomial functions **COM** p49
Algorithmic engineering in adaptive signal processing: worked examples **VIS** p19
Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Analysis and comparison of two order statistics CFAR systems **RSN** p109
Analysis of the adaptive space time processing technique for airborne radar **RSN** p187
Array gain/phase calibration techniques for adaptive beamforming and direction finding **RSN** p25
Artificial neural network and spectrum analysis methods for detecting brain diseases from the CNV response in the electroencephalogram **SMT** p432
Autofocusing technique for adaptive coherent signal-subspace transformation beamformers **RSN** p30
Automatic detection and elimination of periodic pulse shaped interferences in partial discharge measurements **SMT** p335
Bayesian model selection applied to spatial signal processing **VIS** p76
Carrier-free radar signal design with MTI Doppler processor **RSN** p59
Coherent processing of ultra-wideband radar signals **RSN** p171
Comparison between linear FM and phase-coded CW radars **RSN** p230
Comparison of known signal detection schemes under a weakly dependent noise model **VIS** p303
Complex gradient and Hessian **VIS** p380
Critical distance and the performance of sensor array geometries **RSN** p333
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Description of radar targets using the bispectrum **RSN** p159
Design of digital FIR notch filters **VIS** p334
Designs of Chebyshev-type complex FIR filters and digital beamformers with linear-phase characteristics **VIS** p2
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Direct approach to design of PCAS filters with combined gain and phase specification **VIS** p161
DOA estimation method for unknown noise fields **RSN** p149
Effect of antenna aircraft interaction on phased-array radar performance **RSN** p279
Explicit estimation of speech boundaries **SMT** p153
Fast algorithm for adaptive beamforming of cyclic signals **RSN** p312
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Fast time-series adaptive-filtering algorithm based on the QRD inverse-updates method **VIS** p325
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
FIR filter order reduction: balanced model truncation and Hankel-norm optimal approximation **VIS** p168
Fourth-order cumulant matrices for DOA estimation **RSN** p144
Fractal model of a one-dimensional discrete signal and its implementation **VIS** p318
Frequency sampling method for designing 2-D FIR real-coefficient digital filters using Hermite interpolation **VIS** p365
Further results on receivers for the nonlinear channel including pre- and post-nonlinearity filtering **COM** p334
Generalised likelihood-ratio detection of multiple-hop frequency-hopping signals **COM** p70
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
Growler detection in sea clutter using Gaussian spectrum models **RSN** p285
GSC realisations using the two-dimensional transform-domain LMS algorithm **RSN** p270
Hermite sieve as a wavelet-like array for 1D and 2D signal decomposition **VIS** p348
Improved radar tracking using a multipath model: maximum likelihood compared with eigenvector analysis **RSN** p213
Investigation of trellis based filters for tracking **RSN** p9
Jitter in the square synchroniser on direct detection optical communications. III. Numerical results concerning white circuit noise **OPT** p394
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
Linear array geometry synthesis with minimum sidelobe level and null control **MAP** p162
M-sweeps detection analysis of cell-averaging CFAR processors in multiple-target situations **RSN** p103
Manifold interpolation for diversely polarised arrays **RSN** p19
Maximum likelihood beamforming in the presence of multipath and refraction effects **RSN** p263
Measurement preprocessing approach for target tracking in a cluttered environment **RSN** p151
Medium PRF set selection: an approach through combinatorics **RSN** p307
MLSE differential phase detection for M-ary DPSK **COM** p407
Mode-space spatial spectral estimation for circular arrays **RSN** p300
Multifrequency binary testing in measurement and control **SMT** p1
Multilevel quantisation and fusion scheme for the decentralised detection of an unknown signal **RSN** p37
Multiplier-less FIR filter design using a genetic algorithm **VIS** p175
Multisensor, multisite tracking filter **RSN** p75
New high accuracy pulse width modulation based digital-to-analogue convertor/power amplifier **CDS** p315
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 2: signal processing **GTD** p141
Nonlinear echo cancelling using look-up tables and Volterra systems **VIS** p357
Novel approach to the design of I/Q demodulation filters **VIS** p154
Novel efficient approach for the design of equiripple quadrature mirror filters **VIS** p95
Optimum detection of moderately fluctuating radar targets **RSN** p164
Parallel implementation of IMM tracking algorithm using transputers **RSN** p325
Parameter identifiability problem in signal processing **RSN** p133
Performance analysis of a slow FH/MFSK acquisition scheme in random partial band noise jamming **COM** p396
Performance of joint frequency phase modulation over Rayleigh fading channels **COM** p241
Performance of some generalised modified order statistics CFAR detectors with automatic censoring technique in multiple target situations **RSN** p205
Pole placement algorithm for equiripple bandstop filter design **CDS** p325
Power spectrum of wind-influenced vegetation backscatter at X-band **RSN** p125
QRD-based MVDR algorithm for adaptive multipulse antenna array signal processing **RSN** p93
Radar detection in K-distributed clutter **RSN** p116
Recursive single-most-likely-replacement channel equaliser **VIS** p185
Recursive super-resolution algorithm for low-elevation target angle tracking in multipath **RSN** p223
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Self detection performance of an FET active patch antenna under injection locking and its application for PM signal detection **MAP** p253
Simple binary to residue transformation with respect to 2^m+1 moduli **CDS** p522
Simple method for calculating Fourier coefficients of experimentally obtained waveforms **SMT** p177
Spectroscopic and image intensified investigations of RF plasmas in H_2 and CH_4 mixtures **SMT** p95
Stability of a decoupled tracking filter with pseudomeasurements in line-of-sight Cartesian co-ordinate system **RSN** p2
Statistical analysis of state-space approach in harmonic retrieval **VIS** p181
Structure of round-off noise in single-bit second-order sigma-delta modulators with zero input **VIS** p107
Study of the detection and resolution capabilities of a one-dimensional array of sensors by using differential geometry **RSN** p83
Systolic implementation of FIR decimators and interpolators **CDS** p489
Thermometry of lossy microstriplines by correlation radiometry **MAP** p307
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Triple correlation analysis of binary sequences for codeword detection **VIS** p297
Variable digital filter design using the outer product expansion **VIS** p123
Variable-step-size LMS algorithm: new developments and experiments **VIS** p311
VHF antenna array processing: high accuracy direction finding and performance evaluation with real data **RSN** p137

SIMULATION, MODELLING AND IDENTIFICATION

Adaptive allpass filtering for nonminimum-phase system identification **VIS** p373
Alternative algorithm for maximum likelihood DOA estimation and detection **RSN** p293
Bayesian model selection applied to spatial signal processing **VIS** p76
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Comparison of parameter estimators for K-distribution **RSN** p45
Complex gradient and Hessian **VIS** p380
Critical distance and the performance of sensor array geometries **RSN** p333
Estimation of model error for nonlinear system identification **CTA** p403
Extraction and computation of identifiable parameters in robot dynamic models: theory and application **CTA** p48
Fast orthogonal search for array processing and spectrum estimation **VIS** p13
Feedforward time-delay structures in state estimation: finite memory smoothing and continuous deadbeat observers **CTA** p121
Finite sample and modelling error effects on ESPRIT and MUSIC direction estimators **RSN** p249
Globally convergent adaptive blind filters and blind equalisers for mixed-phase channels **COM** p390
GMV technique for nonlinear control with neural networks **CTA** p57
Identification of the SA-330 Puma helicopter **CTA** p130
Least-squares spectrum estimation through a neural network-inverse predictor structure **VIS** p67
Linear splines with adaptive mesh sizes for modelling nonlinear dynamic systems **CTA** p277
MLSE differential phase detection for M-ary DPSK **COM** p407
Mode-space spatial spectral estimation for circular arrays **RSN** p300
Neural network based parameter estimation of unstable aerospace dynamic systems **CTA** p385
Neural network modelling of unknown nonlinear systems subject to immeasurable disturbances **CTA** p216
Observing a subset of the states of linear systems **CTA** p137
Online system identification using Laguerre series **CTA** p249
Optimal-current control of convertor-fed DC motors. II. General case **EPA** p249
Parameter identifiability problem in signal processing **RSN** p133
Power system network topology error detection **GTD** p623
Robust coherent signal-subspace processing for directions-of-arrival estimation of wideband sources **RSN** p256
Robust digital position control of brushless DC motor with adaptive load torque observer **EPA** p63
System identification based on closed-loop step response data **CTA** p107
Taxonomy of dynamic task scheduling schemes in distributed computing systems **CDT** p1
Textured image segmentation by context enhanced clustering **VIS** p413
Time domain algorithm for the estimation of two sinusoidal frequencies **VIS** p33
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm **VIS** p339
Two original weight pruning methods based on statistical tests and rounding techniques **VIS** p230

Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

SINGLE ANTENNAS

Analysis of a dielectric resonator antenna in a cylindrical conducting cavity: HEM modes **MAP** p8
Analysis of offset dual-patch microstrip antenna **MAP** p523
Array-fed reconfigurable reflector for spacecraft applications **MAP** p531
Axial slot antenna on an anisotropic dielectric-coated circular cylinder **MAP** p527
Characterisation of electromagnetically coupled superquadric loop antennas for mobile communications applications **MAP** p85
Design and performance of profiled dielectric loaded horns **MAP** p337
Dichroic design for the orbiting VLBI earth station antenna **MAP** p181
Environmental coupling loss effects in superconducting HF loop antenna design **MAP** p94
Experimental study of the calibration of antenna-screened enclosure combinations for radiated emission measurements in the frequency range from 1 to 30 MHz **SMT** p278
Finite-difference time-domain field approximations for thin wires with a lossy coating **MAP** p107
Full characterisation of varactor-loaded, probe-fed, rectangular, microstrip patch antennas **MAP** p367
Millimetre-wave leaky-wave antennas based on slitted asymmetric ridge waveguides **MAP** p175
Modelling of straight thin wires using time-domain electric field integral equations **MAP** p123
Moment method solution of aperture-coupled hemispherical dielectric resonator antenna using exact modal Green's function **MAP** p377
Offset Fresnel lens antenna **MAP** p517
Precision of radio reflector surfaces adjusted from theodolite-tape measurements **MAP** p23
Scattered field analysis of a focused reflector using the Gabor series **MAP** p216
Simplified treatment of wire-to-plate junctions with magnetic-current frill excitation **MAP** p133
Survey of analytical and numerical models for probe-fed microstrip antennas **MAP** p15
Switching system for single antenna operation of an S-band FMCW radar **RSN** p241
Synthesis of vehicular antenna NVIS radiation patterns using the method of characteristic modes **MAP** p151

SOLID LASERS

Proton-exchange channel waveguide lasers in Nd:MgO:$LiNbO_3$ **OPT** p195

SONAR

Attributed relational tree approach to signal classification **RSN** p319
Critical distance and the performance of sensor array geometries **RSN** p333

SONICS AND ULTRASONICS

Acoustic noise of electromagnetic origin in an ideal frequency-converter-driven induction motor **EPA** p341
Application of ultrasound to the NDT of solid insulation **SMT** p20
Characterising the performance of a confocal acoustic microscope **SMT** p48
Comparison of some noise-compensation methods for speech recognition in adverse environments **VIS** p280
Critical distance and the performance of sensor array geometries **RSN** p333
Detection of weak Doppler signal in a strong carrier: an equivalent high-Q band-elimination filter **CDS** p377
Improved methods for prediction of electromagnetic noise radiated by electrical machines **EPA** p109
Pulse-echo scattering in solids with nonuniform transducers **SMT** p363

SPEECH COMMUNICATION AND PROCESSING

Comparison of some noise-compensation methods for speech recognition in adverse environments **VIS** p280
Enhanced channel coding using source criteria in speech coders **VIS** p191
Error activity and error entropy as a measure of psychoacoustic significance in the perceptual domain **VIS** p203
Explicit estimation of speech boundaries **SMT** p153
Hybrid approach to speech recognition using hidden Markov models and Markov chains **VIS** p273
Multiband linear predictive speech coding at very low bit rates **VIS** p289
Multiresolution morphological fusion of MR and CT images of the human brain **VIS** p137
Neural network-based F0 text-to-speech synthesiser for Mandarin **VIS** p384
Nonlinear cepstral equalisation method for noisy speech recognition **VIS** p397
Novel efficient approach for the design of equiripple quadrature mirror filters **VIS** p95
Speaker-independent isolated word recognition using multiple hidden Markov models **VIS** p197
Use of multiple vector quantisation for semicontinuous-HMM speech recognition **VIS** p391

STABILITY

Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Closed-form solution of the continuous-time Lyapunov matrix equation **CTA** p350
Constrained stable generalised predictive control **CTA** p274
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Improvement of induction machine stability by modulation techniques **EPA** p347
Integrated fourth-order $\Sigma\Delta$ convertor with stable self-tuning continuous-time noise shaper **CDS** p145
Mixed H_∞ optimisation with model-matching **CTA** p329
Neural network based parameter estimation of unstable aerospace dynamic systems **CTA** p385
New robust model reference adaptive control algorithm **CTA** p177
Numerical robustness and efficiency of generalised predictive control algorithms with guaranteed stability **CTA** p154
Practical Sagnac interferometer based fibre optic current sensor **OPT** p249
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Robust nonlinear control of heating plant **CTA** p227
Robust stabilisation for a class of time-delay nonlinear systems **CTA** p285
Robust trajectory tracking for flexible piezoelectric structures **CTA** p289
Sampling-time effects of higher-order digitisations and their applications in digital redesign **CTA** p83
Simultaneous robust stabilisation of two normalised coprime factor plant balls **CTA** p191
Stabilising properties of constrained predictive control **CTA** p295
When can the decentralised state feedback be realised as a static output feedback? **CTA** p104

SUPERCONDUCTING MATERIALS AND DEVICES

Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
DC motors with high-critical-temperature superconducting field winding and slotless armature **EPA** p135
Electrically controlled HTSC/ferroelectric coplanar waveguide **MAP** p501
Environmental coupling loss effects in superconducting HF loop antenna design **MAP** p94
Hybrid AC superconducting current limiter: small-scale experimental model **GTD** p117

SWITCHGEAR

Electrical arc ignition in narrow slots: high-voltage generation **GTD** p263
High-voltage expulsion fuses: energy dissipation and design goals **GTD** p205
High-voltage fuse behaviour with varistor commutation **GTD** p33
Ignition of an electrical arc in a capillary: arc parameters in the initial period **GTD** p480
Influence of humidity on the breakdown mechanism of medium length rod-plane gaps stressed by positive impulse voltages **SMT** p407
Metal vapour densities in a pseudospark switch **SMT** p148
Probabilistic approach to transient stability evaluation **GTD** p537
Relationship between circuit-breaker performance and nozzle blocking, contact evaporation and particle production **SMT** p508
Spectroscopic observation of high breaking capacity fuse arcs **SMT** p123

SWITCHING SYSTEMS

Analysis of out-of-sequence problem and preventative schemes in parallel switch architecture for high-speed ATM network **COM** p29
B-tree: a high-performance fault-tolerant ATM switch **COM** p20
Conceptual survey of phase modulation based wavelength registered networks **OPT** p53
Design and performance analysis of input-output buffering delta-based ATM switch with backpressure mechanism **COM** p255
Impact of input signals on the bit error rate performance of semiconductor-laser-amplifier-based switch systems **OPT** p265
Multistage optoelectronic switch networks **OPT** p173
Performance analysis of ATM switches using priority schemes **COM** p248
Performance analysis of the knockout switch with input buffers **COM** p183
Towards an optical ether [optically routed broadband network] **OPT** p327

SWITCHING THEORY

Analysis of out-of-sequence problem and preventative schemes in parallel switch architecture for high-speed ATM network **COM** p29
B-tree: a high-performance fault-tolerant ATM switch **COM** p20
Conceptual survey of phase modulation based wavelength registered networks **OPT** p53
Design and performance analysis of input-output buffering delta-based ATM switch with backpressure mechanism **COM** p255
Design of a high performance nonblocking copy network for multicast ATM switching **COM** p317
Dual forms of Reed-Muller expansions **CDT** p184
Effect of nonuniform traffic on the performance of multistage interconnection networks **CDT** p169
Efficient modelling and synthesis procedure of asynchronous sequential logic elements **CDT** p61
Genetic beam search for gate matrix layout **CDT** p123
Heterogeneous Petri net methodology for the design of complex controllers **CDT** p293
Impact of input signals on the bit error rate performance of semiconductor-laser-amplifier-based switch systems **OPT** p265
Minimisation of control store width in digital systems **CDT** p243
Multistage optoelectronic switch networks **OPT** p173
Near time-optimal control of nonlinear servomechanisms **CTA** p145
Performance analysis of a multicast packet switch with capacity m **COM** p177
Performance analysis of an ATM statistical multiplexer with batch arrivals **COM** p190
Performance analysis of ATM switches using priority schemes **COM** p248
Performance analysis of the knockout switch with input buffers **COM** p183
Performance evaluation of BIN/ABIN networks in buffered/unbuffered packet-switched environments **CDT** p29
Petri-net-based algorithms for parallel-controller synthesis **CDT** p405
Preventing tree saturation in multistage networks **CDT** p35
Processor allocation strategies for modified hypercubes **CDT** p196
Quick recovery of two embedded complete binary trees in a hypercube **CDT** p205
State merging and state splitting via state assignment: a new FSM synthesis algorithm **CDT** p229
Transient analysis and hazard-free design of exclusive-OR switching networks **CDT** p274
Transmission of compressed voice over integrated services frame relay networks: priority service and adaptive buildout delay **COM** p265

SYNCHRONOUS MACHINES

Advance calculation of the characteristic quantities of synchronous machines and comparison with measured values **EPA** p13
Analysis and control of torque ripples in inverter-fed permanent-magnet synchronous motors using the electromechanical spring-stiffness coefficient $\partial T_e/\partial\theta$ **EPA** p169
Analysis of transformer-generator interaction in the harmonic domain **GTD** p38
Block diagram transfer function model of a generator including damper windings **GTD** p599
Brushless exciter model **GTD** p61
Computer-optimised current waveforms for switched-reluctance motors **EPA** p45
Damper windings in synchronous machines fed by a current-source inverter **EPA** p229
Effect of end core flux on the performance of the switched reluctance motor **EPA** p308
Effect of rotor dimensions and cross magnetisation on L_d and L_q inductances of reluctance synchronous machine with cageless flux barrier rotor **EPA** p213
Field-weakening performance of brushless synchronous AC motor drives **EPA** p331
Performance of interior-type permanent-magnet alternator **EPA** p186
Robust low-cost implementation of vector control for reluctance synchronous machines **EPA** p1
Three-transfer-function approach for building phenomenological models of synchronous machines **GTD** p89
Torque harmonics minimisation in permanent magnet synchronous motor with back EMF estimation **EPA** p323

SYSTEMS THEORY

Adaptive control of discrete-time nonlinear systems using recurrent neural networks **CTA** p169
Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Adaptive tracking control of an induction motor with robustness to parametric uncertainty **EPA** p85
Advanced aircraft flight control using nonlinear inverse dynamics **CTA** p418
Artificial neural network and spectrum analysis methods for detecting brain diseases from the CNV response in the electroencephalogram **SMT** p432
Bilinear self-tuning control of a high temperature heat treatment plant **CTA** p12
Block partial derivative and its application to neural-net-based direct model-reference adaptive control **CTA** p305
Closed-form solution of the continuous-time Lyapunov matrix equation **CTA** p350
Decentralised multivariable control and stability of a gas turbine engine **CTA** p357
Decoupling design of multivariable generalised predictive control **CTA** p197
Design of universal variable-structure controller for dynamic stabilisation of power systems **GTD** p363
Dynamic programming approach for nonlinear systems **CTA** p409
Dynamical sliding mode control approach for vertical flight regulation in helicopters **CTA** p19
Exponentially stable robust control law for robot manipulators **CTA** p389
Extension of the covariance control principle to nonlinear stochastic systems **CTA** p93
Global robust adaptive control of power systems **GTD** p429
GMV technique for nonlinear control with neural networks **CTA** p57
Heterogeneous Petri net methodology for the design of complex controllers **CDT** p293
High-performance controllers for HVDC transmission links **GTD** p422
Kernels of anticausal operators and the multivariable generalised predictive control problem **CTA** p181
Linear splines with adaptive mesh sizes for modelling nonlinear dynamic systems **CTA** p277
Multivariable adaptive control of AC-DC systems **GTD** p658
Near time-optimal control of nonlinear servomechanisms **CTA** p145
Necessary conditions for limit cycles in multiloop relay systems **CTA** p163
Neural-net controller for nonlinear plants: design approach through linearisation **CTA** p315
New method of parametric eigenvalue assignment in state feedback control **CTA** p223
New sequential design procedures for multivariable systems based on Gauss-Jordan factorisation **CTA** p427
Novelty detection and neural network validation **VIS** p217
Optimally decoupled robust control of MIMO plants with multiple delays **CTA** p25
Parallel algorithm for pole assignment of multi-input systems **CTA** p367
PID controller design for a TITO system **CTA** p111
Robust control design via eigenstructure assignment, genetic algorithms and gradient-based optimisation **CTA** p202
Robust nonlinear control of heating plant **CTA** p227
Robust stabilisation for a class of time-delay nonlinear systems **CTA** p285
Robust trajectory tracking for flexible piezoelectric structures **CTA** p289
Stabilising properties of constrained predictive control **CTA** p295
Structural modelling and optimisation of large scale systems **CTA** p1
Supervised learning control of a nonlinear polymerisation reactor using the CMAC neural network for knowledge storage **CTA** p33
Supervisory generalised predictive control and fault detection for multivariable anaesthesia **CTA** p70
Taxonomy of dynamic task scheduling schemes in distributed computing systems **CDT** p1
Total control of fast coordinate measuring machines **CTA** p373
When can the decentralised state feedback be realised as a static output feedback? **CTA** p104

TELECOMMUNICATION

Channel error profiles for DECT **COM** p413
Electronic mail: case study in task-oriented restructuring of application domain **CDT** p65
Enhanced channel coding using source criteria in speech coders **VIS** p191
Identity-based conference key broadcast systems **CDT** p57
Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Low bitrate video coding with depth compensation **VIS** p149
Multiband linear predictive speech coding at very low bit rates **VIS** p289
Nonlinear echo cancelling using look-up tables and Volterra systems **VIS** p357
Performance analysis and sequence designs of synchronous code-division multiple-access systems with multimedia services **COM** p371

TELEMETRY

Low-power optical current measurement system employing a hybrid transmitter **SMT** p129

TELEVISION

Image sequence coding using quadtree-based block-matching motion compensation and classified vector quantisation **VIS** p453
Low bitrate video coding with depth compensation **VIS** p149
NTSC component separation via Hadamard transform **VIS** p27

THIN FILM GROWTH

Characterisation of InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating for $\lambda=1.55\ \mu m$ **OPT** p323
In-situ phosphorous-doped VLPCVD polysilicon layers for polysilicon thin-film transistors **CDS** p19
Low-temperature ($\leqslant 600°C$) polysilicon thin-film transistors **CDS** p9
Optoelectronic and structural properties of polysilicon produced by excimer laser and furnace crystallisation of hydrogenated amorphous silicon (a-Si:H) **CDS** p15
Performance of 1.3 μm ridge waveguide distributed feedback lasers fabricated by one-step metalorganic chemical vapour deposition **OPT** p316

TIME-VARYING SYSTEMS

Adaptive neural-network-based approach for the control of continuously stirred tank reactor **CTA** p341
Extension of the covariance control principle to nonlinear stochastic systems **CTA** p93
Neural-net controller for nonlinear plants: design approach through linearisation **CTA** p315
Robust stabilisation for a class of time-delay nonlinear systems **CTA** p285
Two-stage suboptimal dual controller for systems with stochastic parameters using optimal predictors **CTA** p255

TRANSFORMERS

Analysis of transformer-generator interaction in the harmonic domain **GTD** p38
Back-EMF waveforms and core losses in brushless DC motors **EPA** p144
Calculation of winding losses in high-frequency toroidal inductors using single strand conductors **EPA** p52
Comparison between two formulations in terms of potential for the coupling of magnetic and electric circuit equations **SMT** p486
Eddy current add-on for frequency dependent representation of winding losses in transformer models used in computing electromagnetic transients **GTD** p209
Effects of harmonic distortion of the supply voltage on the optimum performance of a thyristor controlled reactor-type compensator **SMT** p15
Integrated digital power transformer protection **GTD** p323
Low-power optical current measurement system employing a hybrid transmitter **SMT** p129
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 1: signal measurement **GTD** p133
Review of chemical indicators of degradation of cellulosic electrical paper insulation in oil-filled transformers **SMT** p324
Self-calibratable voltage transformer with part-per-million accuracy **SMT** p379
Studies on impulse behaviour of a transformer winding with simulated faults by analogue modelling **GTD** p401
Substation power-transformer-loading analysis and computer simulations of loadability under realistic operating conditions **GTD** p413
Transformer inrush calculations using a coupled electromagnetic model **SMT** p491
Voltage stability as affected by discrete changes in the topology of power networks **GTD** p346

TRANSMISSION LINE THEORY

Accurate absorbing boundary conditions for the FDTD analysis of H-plane waveguide discontinuities **MAP** p59
Analysis of a dielectric resonator antenna in a cylindrical conducting cavity: HEM modes **MAP** p8
Analysis of linearly polarised modes in elliptical-core fibre **OPT** p356
Broadband design of coaxial line/rectangular waveguide probe transition **MAP** p53
Capacitance of circularly symmetric via for microstrip transmission line **MAP** p265
Characteristic impedance of rectangular coaxial cone transmission line **MAP** p326
Design and performance of profiled dielectric loaded horns **MAP** p337
Design procedures for passive planar coupled waveguide devices **OPT** p231
Detailed computation of the effects on the performance of open resonators caused by imperfections in the resonator geometry **MAP** p451
Dyadic Green's functions for rectangular waveguide filled with longitudinally multilayered isotropic dielectric and their application **MAP** p504
Elliptical waveguide analysis using improved polynomial approximation **MAP** p483
Expansion of an arbitrary field in terms of waveguide modes **OPT** p16
Experimental evaluation of junction circulators: a review **MAP** p351
Finite element analysis of propagating, evanescent, and complex modes in finlines **MAP** p65
Frequency dependent transmission line loss in quasitransversal microwave filters **MAP** p402
Full-vectorial mode calculations by finite difference method **OPT** p281
Fullwave analysis of multilayer microstrip lines **MAP** p185
Inline fibre-optic refractometry using index-sensitive resonance positions in single-mode fibre-to-planar-polymer-waveguide couplers **OPT** p299
Method of lines for analysis of planar conductors with finite thickness **MAP** p223
Method of partial overlapping regions for the analysis of diffraction problems **MAP** p196

Modelling of arbitrarily shaped MMIC and hybrid planar circuits with a mixed waveguide model boundary integral method **MAP** p495
New frequency-domain TLM method for the numerical solution of steady-state electromagnetic problems **SMT** p310
Novel method of calculating the characteristic impedance of a coaxial transmission line of arbitrary cross-section **MAP** p423
Polarisation-dependent coupling in twin-core fibres with arbitrary elliptical cores **OPT** p43
Quasi-static analysis of skewed transmission lines for MMIC applications **MAP** p246
Radiation modes of a fibre part 1: construction and properties **OPT** p287
Rigorous analysis of lunar waveguides with the boundary element method **MAP** p235
Rigorous analysis of the higher order modes, impedance and attenuation factor of coupled striplines **MAP** p167
Scattering from a rectangular aperture in rectangular-to-circular and circular-to-circular waveguide junctions **MAP** p489
Scattering properties of discontinuities in NRD guide **MAP** p205
Simplified Green's functions for calculating capacitance and inductance of multiconductor transmission lines in multilayered media **MAP** p141
Simulating 3D waveguide discontinuities using a combination of Prony's method and FDTD with improved absorbing boundary conditions **MAP** p127
Single Mueller matrix description of the propagation of degree of polarisation in a uniformly anisotropic single-mode optical fibre **OPT** p367
Successive asymptotic waveform evaluation of lossy distributed networks with nonlinear terminations **MAP** p473
Taking into account the edge condition in the problem of scattering from the circular aperture in circular-to-rectangular and rectangular-to-rectangular waveguide junctions **MAP** p45
Technique for modelling resonant strip placed in the transverse plane of a rectangular waveguide **MAP** p329
Theoretical and experimental investigations on orthogonal mode coupler **MAP** p261
Transmission-line delay limitations of laser bandwidths **OPT** p163
Wave propagation along a fully or a partially loaded parallel plate chirowaveguide **MAP** p299

USER INTERFACES

Constraints imposed by programme content on design, delivery and use of interactive media **CDT** p85
Electronic mail: case study in task-oriented restructuring of application domain **CDT** p65
Flexibility in interface development **CDT** p93
Integrated architectures for database interface development **CDT** p73
Neural network-based F0 text-to-speech synthesiser for Mandarin **VIS** p384
Relationship between user models in HCI and AI **CDT** p99
Representation and use of task knowledge in a user interface design environment **CDT** p79

WAVEGUIDE COMPONENTS

Accurate absorbing boundary conditions for the FDTD analysis of H-plane waveguide discontinuities **MAP** p59
Automation-orientated techniques for quality-factor measurement: of high-T_c superconducting resonators **SMT** p527
Broadband design of coaxial line/rectangular waveguide probe transition **MAP** p53
Coplanar waveguide two-stage balanced MMIC amplifier using impedance-transforming lumped-distributed branchline couplers **MAP** p241
Detailed computation of the effects on the performance of open resonators caused by imperfections in the resonator geometry **MAP** p451
Equivalent circuit model for microstrip multiport radial dividers **MAP** p333
Experimental evaluation of junction circulators: a review **MAP** p351
Frequency dependent transmission line loss in quasitransversal microwave filters **MAP** p402
Optimisation of radiation efficiency for a transverse ground-plane slot in boxed-stripline **MAP** p505
Simulating 3D waveguide discontinuities using a combination of Prony's method and FDTD with improved absorbing boundary conditions **MAP** p127
Symmetrical five-port waveguide junction with −20 dB residual mismatch over waveguide bandwidth **MAP** p101
Taking into account the edge condition in the problem of scattering from the circular aperture in circular-to-rectangular and rectangular-to-rectangular waveguide junctions **MAP** p45
Theoretical and experimental investigations on orthogonal mode coupler **MAP** p261

WAVEGUIDE THEORY

Characteristic impedance of rectangular coaxial cone transmission line **MAP** p326
Non-unit protection technique for EHV transmission systems based on fault-generated noise. Part 1: signal measurement **GTD** p133

WAVEGUIDES

Broadband design of coaxial line/rectangular waveguide probe transition **MAP** p53
Capacitance of circularly symmetric via for microstrip transmission line **MAP** p265
Design and performance of profiled dielectric loaded horns **MAP** p337
Electrically controlled HTSC/ferroelectric coplanar waveguide **MAP** p501
Finite element analysis of propagating, evanescent, and complex modes in finlines **MAP** p65
Fullwave analysis of multilayer microstrip lines **MAP** p185
Laser beam modulator of partially loaded microstrip line structure **OPT** p145
Method of lines for analysis of planar conductors with finite thickness **MAP** p223
Microstrip with dielectric overlay: variational analysis and validation **MAP** p138
Rigorous analysis of lunar waveguides with the boundary element method **MAP** p235
Rigorous analysis of the higher order modes, impedance and attenuation factor of coupled striplines **MAP** p167
Scattering properties of discontinuities in NRD guide **MAP** p205
Simplified Green's functions for calculating capacitance and inductance of multiconductor transmission lines in multilayered media **MAP** p141
Simulating 3D waveguide discontinuities using a combination of Prony's method and FDTD with improved absorbing boundary conditions **MAP** p127
Technique for modelling resonant strip placed in the transverse plane of a rectangular waveguide **MAP** p329
Thermometry of lossy microstriplines by correlation radiometry **MAP** p307

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $7.50 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7062/94 $7.50 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 071 240 1871; telex: 261176 IEELDN G; facsimile: 071 240 7735.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

ARRAY PROCESSING

Parallel design of arithmetic coding. J. Jiang and S. Jones p327
Processor allocation strategies for modified hypercubes. S.G. Ziavras and N.G. Haravu p196

CIRCUIT THEORY AND DESIGN

Design of residue generators and multioperand adders modulo 3 built of multi-output threshold circuits. S.J. Piestrak p129
FSMTEST: synthesis for testability and test generation of PLA-based FSM. M.J. Avedillo, J.M. Quintana and J.L. Huertas p221
General area router based on planning techniques. S.-J. Chen, C.-C. Tsai, Y.-L. Chen and Y.-H. Hu p413
Genetic beam search for gate matrix layout. K. Shahookar, W. Khamisani, P. Mazumder and S.M. Reddy p123
Optimised synthesis of delay-insensitive circuits using time-sharing. H.F. Li, S.C. Leung and P.N. Lam p111
Pipeline ring data-flow architecture for solving large iterative structures. E. Walker and G. Morgan p212
State merging and state splitting via state assignment: a new FSM synthesis algorithm. M.J. Avedillo, J.M. Quintana and J.L. Huertas p229
Ultrafast pipelined arithmetic using quantum electronic devices. S. Mohan, P. Mazumder and G.I. Haddad p104

CODES AND DECODING

Application of the CMAC input encoding scheme in the *N*-tuple approximation network. A. Kolcz and N.M. Allinson p177
Decoding the (73, 37, 13) quadratic residue code. X. Chen, I.S. Reed and T.K. Truong p253
Enhancing the security of El Gamal's signature scheme. J. He and T. Kiesler p249
Interleaving security and efficiency considerations in the design of inexpensive IC cards. B. Arazi p265
Parallel decoding of the [*23, 12, 7*] binary Golay code. S.M. Dodunekov and J.E.M. Nilsson p119
Public-key cryptosystem design based on factoring and discrete logarithms. L. Harn p193
Threshold cryptosystem with multiple secret sharing policies. L. Harn, H.-Y. Lin and S. Yang p142

COMMUNICATION SYSTEMS THEORY

Analysis and improvement of an access control scheme with user authentication. S.-M. Yen and C.-S. Laih p271
Electronic mail: case study in task-oriented restructuring of application domain. S.T. Fleming and A.C. Kilgour p65

COMMUTATION

Message optimal fully decentralised evaluation of associative and commutative functions. S.-M. Yuan p238

COMPUTER APPLICATIONS

Electronic mail: case study in task-oriented restructuring of application domain. S.T. Fleming and A.C. Kilgour p65
Flexibility in interface development. B.S. Murray and E.A. Edmonds p93
Representation and use of task knowledge in a user interface design environment. P. Markopoulos, S. Wilson and P. Johnson p79
Table driven Newton scheme for high precision logarithm generation. M. Zhang, J.G. Delgado-Frias and S. Vassiliadis p281

DESIGN

Taxonomy of dynamic task scheduling schemes in distributed computing systems. H.G. Rotithor p1

DETECTION

Non-analytic object recognition using the Hough transform with the matching technique. P.-K. Ser and W.-C. Siu p11

DIGITAL CIRCUITS

Automated technique for high-level circuit synthesis from temporal logic specifications. R. Dowsing, R. Elliott and I. Marshall p145

DIGITAL COMMUNICATION SYSTEMS

Enhancing the security of El Gamal's signature scheme. J. He and T. Kiesler p249

DIGITAL COMPUTERS AND COMPUTATION

Minimisation of control store width in digital systems. G. Masera, G. Piccinini and M. Zamboni p243
Montgomery reduction with even modulus. Ç.K. Koç p314

ERRORS AND ERROR ANALYSIS

Decoding the (73, 37, 13) quadratic residue code. X. Chen, I.S. Reed and T.K. Truong p253
Design of residue generators and multioperand adders modulo 3 built of multi-output threshold circuits. S.J. Piestrak p129

FAULT DETECTION

Concurrent error detection in high-speed carry-free dividers. C.-L. Wey, N. Berthelot and B. Veltkamp p356
Design for testability of sequential circuits. X. Sun and F. Lombardi p153

FAULT LOCATION

Chip level fault location using X-algorithm. H. Jiang and J.C. Majithia p259

GRAPH THEORY AND TOPOLOGY

Petri-net-based algorithms for parallel-controller synthesis. K. Bilinski, M. Adamski, J.M. Saul and E.L. Dagless p405

HAZARDS

Transient analysis and hazard-free design of exclusive-OR switching networks. C. Ouyang and A. Tran p274

IMAGE PROCESSING

Constraints imposed by programme content on design, delivery and use of interactive media. D.R. Clark p85

INTEGRATED CIRCUITS

Interleaving security and efficiency considerations in the design of inexpensive IC cards. B. Arazi p265
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs. S. Chattopadhyay, S. Roy and P. Pal Chaudhuri p361

INTERFACE STATES

Integrated architectures for database interface development. N.W. Paton, R.L. Cooper, D. England, G. al-Qaimari and A.C. Kilgour p73

LOGIC

Design of residue generators and multioperand adders modulo 3 built of multi-output threshold circuits. S.J. Piestrak p129
Dual forms of Reed–Muller expansions. D.H. Green p184
Efficient modelling and synthesis procedure of asynchronous sequential logic elements. J.-W. Kang, P.D. Fisher and C.-L. Wey p61
Genetic beam search for gate matrix layout. K. Shahookar, W. Khamisani, P. Mazumder and S.M. Reddy p123
Transient analysis and hazard-free design of exclusive-OR switching networks. C. Ouyang and A. Tran p274

MATHEMATICAL TECHNIQUES

Cellular automata as a BIST structure for testing CMOS circuits. S. Nandi, B. Vamsi, S. Chakraborty and P. Pal Chaudhuri p41
Chip level fault location using X-algorithm. H. Jiang and J.C. Majithia p259
Concurrent error detection in high-speed carry-free dividers. C.-L. Wey, N. Berthelot and B. Veltkamp p356
Constant-division algorithms. P. Srinivasan and F.E. Petry p334
Distributed system for VLSI layout compaction. R. Byrne and G.C. Shoja p49
Division unit with Newton–Raphson approximation and digit-by-digit refinement of the quotient. P. Montuschi, L. Ciminiera and A. Giustina p317
General area router based on planning techniques. S.-J. Chen, C.-C. Tsai, Y.-L. Chen and Y.-H. Hu p413
Guiding instruction scheduling with synchronisation markers on a superscalar based multiprocessor. R.-Y. Hwang and F. Lai p398
Identity-based conference key broadcast systems. T. Hwang and J.L. Chen p57
Load balancing algorithms for an extended hypercube. J. Mohan Kumar, L.M. Patnaik and A. Das p298
Minimisation of control store width in digital systems. G. Masera, G. Piccinini and M. Zamboni p243
Minimisation of fixed-polarity AND/XOR canonical networks. C.-C. Tsai and M. Marek-Sadowska p369
Montgomery reduction with even modulus. Ç.K. Koç p314
Multi-exponentiation. S.-M. Yen, C.-S. Laih and A.K. Lenstra p325
Performance of scheduling algorithms for channel reservation. J.J. Harms and J.W. Wong p341
Quick recovery of two embedded complete binary trees in a hypercube. C.-C. Hsu and Y.-W. Liu p205
Radix digit-serial pipelined divider/square-root architecture. A.E. Bashagha and M.K. Ibrahim p375
Transient analysis and hazard-free design of exclusive-OR switching networks. C. Ouyang and A. Tran p274
Unified approach to designing parallel Winograd algorithms. S. Yuan and J.-C. Tsay p161
VLSI structures for bit-serial modular multiplication using basis conversion. M.G. Parker and M. Benaissa p381

MICROPROCESSORS

Minimisation of control store width in digital systems. G. Masera, G. Piccinini and M. Zamboni p243

NETWORKS

Application of the CMAC input encoding scheme in the *N*-tuple approximation network. A. Kolcz and N.M. Allinson p177
Effect of nonuniform traffic on the performance of multistage interconnection networks. M. Atiquzzaman and M.S. Akhtar p169
General area router based on planning techniques. S.-J. Chen, C.-C. Tsai, Y.-L. Chen and Y.-H. Hu p413
Performance evaluation of BIN/ABIN networks in buffered/unbuffered packet-switched environments. T. Stouraitis p29
Preventing tree saturation in multistage networks. Md. N. Karim and A. El-Amawy p35

PICTURE PROCESSING AND PATTERN RECOGNITION

Constraints imposed by programme content on design, delivery and use of interactive media. D.R. Clark p85

SIMULATION

Analysis and simulation of multiple-ring token networks. D.A. Vasko and R. Rajsuman p135
Relationship between user models in HCI and AI. H. Johnson p99
Representation and use of task knowledge in a user interface design environment. P. Markopoulos, S. Wilson and P. Johnson p79

SWITCHES AND SWITCHING THEORY

Transient analysis and hazard-free design of exclusive-OR switching networks. C. Ouyang and A. Tran p274

TELECOMMUNICATION

Implementation of dynamic look-up tables. N. Clarke and A. Cantoni p391

TOLERANCE ANALYSIS

Fault-tolerant design methodology for systolic array architectures. M.O. Esonu, A.J. Al-Khalili, S. Hariri and D. Al-Khalili p17

TRANSFORMERS

Non-analytic object recognition using the Hough transform with the matching technique. P.-K. Ser and W.-C. Siu p11

VERY LARGE SCALE INTEGRATION

Concurrent error detection in high-speed carry-free dividers. C.-L. Wey, N. Berthelot and B. Veltkamp p356

Genetic beam search for gate matrix layout. K. Shahookar, W. Khamisani, P. Mazumder and S.M. Reddy p123

Radix digit-serial pipelined divider/square-root architecture. A.E. Bashagha and M.K. Ibrahim p375

Stride: a tool for formal interactive system synthesis. F.P. Burns, D.J. Kinniment and A.M. Koelmans p347
